Acton

**853-4534**

**New RNA**

Until now it has been believed that a double helix of RNA (ribonucleic acid) occurs only in a right-handed conformation, meaning that the two strands spiral about each other in a clockwise direction. However, a research team led by Ignacio Tinoco Jr., a chemist with LBL's Chemical Biodynamics division, has created in the laboratory a left-handed conformation, where the strands spiral counterclockwise.

**Study of Stars, Galaxies**

The Faint Object Spectrograph (FOS), built under contract to NASA at a cost of more than \$30 million, has been delivered to the Lockheed Corporation in Sunnyvale, California for integration into the telescope, according to Larry Randall, deputy director of CASS.

**Herbed Butter**

Prepare a herbed butter by creaming a quarter pound of soft butter with a tablespoon or so of dried or fresh herbs. Try garlic, dill, savory, thyme, chives or basil.

**Big Variety**

California produces a greater diversity of crops than any other state.
