Here's a design ideal for a lot that slopes to the rear; rooms are positioned to capture the view to the rear of the lot. This design may be built as a bungalow with a crawlspace foundation or with a 1,725 square foot basement. The design includes a suggested above ground basement layout. The basement layout features an expansive recreation room with bay window sitting area, wet bar, covered patio and fireplace. Two stairway accesses to the second level provides added convenience and eases the traffic flow. The spacious fourth bedroom offers a walk-in closet and three piece ensuite with soaking tub. The two additional rooms, each with wall closets may be used for storage, an extra bedroom or den. A main bathroom and wine cellar or pantry complete the lower level. Stepping up from the sunken foyer is a main skylit hallway with planter ledges over. Directly in view is a vaulted living room, with fireplace, and adjoining dining room. The efficient U-shaped kitchen with abundant counter space and sunny breakfast bay, has a handy pass through to the dining room. A large deck expands living space and encourages outdoor entertaining. The bedrooms are positioned away from the noisy traffic areas. The master bedroom boasts a bay window sitting area, walk-in wall closets and lavish ensuite with whirlpool spa and shower. The two additional bedrooms share a main bath. The finished floor area of this home is 1,773 square feet. Send for Canada's largest plan book with over 330 designs and 280 pages. Imagine one plan book that includes stately brick manors to dramatic wood and glass contemporaries, only \$12.95 including shipping. To build Plan No. 90-1773, order an 8 set blueprint package for \$395.00, or 5 sets for \$345.00 plus \$14.00 shipping.
