Business pyramid system halts crimes in Acton

By ALAN MACKIE
The Herald

The Acton Business Alert system run by the Halton Regional Police Force has already stopped two known crimes, Village Constable Bill Riddle said.

But there is no real way to tell how many crimes have been prevented since the programbegan almost a year ago, Const. Riddle said.

He said if a man decides to rob a bank and sees a police officer hanging around, the culprit might decide it's not such a good idea.

The system works like a pyramid, Const. Riddle said. Once one business is contacted, that business is required to call two other businesses who are each required to contact two businesses until the bottom of the pyramid is reached, he said.

The businesses at the bottom of the chain are the ones with more employees, he noted. The more employees a company has, the more liable it is to lose the message before it calls the others.

Const. Riddle actually starts the pyramid when he calls the first business on the lists to warn them of possible criminal activities.

Since the program started two known crimes have been prevented he said. "One incident makes it all worthwhile, two was a bonus."

Two incidents of a person trying to pass a counterfeit bill was stopped when Const. Riddle contacted the 60 businesses involved through the "Business Alert" system. Each time a counterfeit \$100 bill was presented to a cashier it was quickly taken back when the cashier attempted to check the bill with a list of serial numbers. "Although we didn't catch them, it did prevent a crime."

Another incident was a fraud case in which the alert had been sent on a Friday. The following Monday morning a restaurant called the police saying they had seen the suspect and "within minutes" he was caught.

Const. Riddle divided the system into five sections so "the story doesn't change and it's (the program) a little more managable."

It helps when you have businesses that are very community minded like Acton, he said. The program may also expand into Georgetown later this year, he added.

He also likes the fact that the program is flexible enough to use if a child goes missing. Once the alert is sent through there is another 60 sets of eyes looking for a missing child, he said.

The program has been implemented in larger communities, Const. Riddle said. The large programs used a computerized machine to send its alerts, he said. "A personal touch rather than computers works well in a small community," Const. Riddle said.

A computer will not answer questions if somebody misses a part of the message, it will merely hang up and dial the next number, he said.

"I guess the reason it does work is because of the personal involvement," he said.

PUBLIC NOTICE

RECONSTRUCTION OF STEELES AVENUE FROM JAMES SNOW PARKWAY

TO FIFTH LINE SOUTH TOWN OF HALTON HILLS

Notice is hereby given pursuant to Section 298 and 301 of The Ontario Municipal Act., R.S.O. 1980, Chapter 302 as amended, that the Council for the Regional Municipality of Halton proposes at its meeting on May 23, 1990 to pass a by-law for the reconstruction of Steeles Avenue from James Snow Parkway to Fifth Line South, Town of Halton Hills.

Plans showing the proposed work may be inspected at the Public Works Department offices, 2316 South Service Road West, Oakville, Ontario, during normal business hours.

On May 16, 1990 at 9:30 a.m. in Committee Room No. 1 at the Regional Administration Building, 1151 Bronte Road, Oakville, Ontario, Council through its Planning and Public Works Committee will hear in person, or by his Counsel, any person who claims that his lands will be prejudicially affected by the said by-law and who applies to the Regional Clerk, no later than May 9, 1990 to be heard.

Louise Temple Regional Clerk
