This handsome four bedroom bungalow offers two exterior finishes. The 1809 square foot home may be built with horizontal siding and bay window or with California stucco and bold box window. A long planter ledge visually zones the skylit foyer from the living and dining rooms and accentuates the vaulted ceilings throughout this area. A peninsular counter provides the kitchen with extra work space and separates the valued, open plan family and breakfast room from the kitchen. Window walls flanking the family room's fireplace create an exciting feature wall. Sliding glass door from the family room opens to a covered patio - ideal for outdoor entertaining.

The vaulted master bedroom features a spacious walk-in closet and ensuite with twin vanity and soaking tub. The three additional bedrooms share a three-piece main bath. The fourth bedroom, with built-in desk, can easily double as a den or study.

Send for Canada's largest plan book with over 330 designs and 280 pages.
