**CLASS ENVIRONMENTAL ASSESSMENT
PHASE 3
SILVER CREEK TRUNK SEWER STUDY
PR-1119
TOWN OF HALTON HILLS (GEORGETOWN)
PUBLIC INFORMATION SESSION NO. 3
Tuesday, October 23, 1990**

The Regional Municipality of Halton is planning the above-mentioned project pursuant to the Environmental Assessment Act.

The purpose of the Silver Creek trunk sewer study is to assess the provision of additional capacity for wastewater flows to accommodate growth within the new Georgetown Urban area. Proposed developments are presently restricted due to capacity restraints in the existing trunk sewer.

The preferred option consists of a second 600 mm diameter sewer parallel to the existing 600 mm diameter trunk sewer in the Silver Creek Valley from Main Street to just east of Mountainview Road.

Various alternatives for expanding servicing capacity were evaluated in 1989 during Phase 2 and 3 of the Class Environmental Assessment planning and design process. Alternative design concepts for twinning the trunk sewer have been evaluated.

The third Public Information Session will be held from 6:00 p.m. to 9:00 p.m. Tuesday, October 23, 1990 in the Committee Room of the new Municipal Building of the Town of Halton Hills on Maple Avenue regarding the above-mentioned project, in accordance with the requirements of the Class Environmental Assessment for Municipal Sewage Projects.
