Economy Forms recognizes employees

Economy Forms Corporation, involved with the concrete construction industry, gave awards to three of its long serving Georgetown employees. The three men were presented with plaques by Bernie Savard (second from right), vice-president, Canadian General Manager at banquet saturday evening at the North Halton Golf and Country Club. From left to right are Dennis Norton, (15 years), John Murphy (25 years), and (far right) Jerry Verrette (25 years). (Herald photo)

Businesses recognized at awards ceremony

TORONTO - Fifteen Ontario businesses were awarded trophies by Industry, Science and Technology Minister Benoit Bouchard at the 1990 Canada Awards for Business Excellence ceremony in Ottawa.

Minister Bouchard presented gold trophies to Alias Research Inc. of Toronto, Cangene Corporation of Mississauga, IBM Canada Ltd., Toronto, Northern Telecom Canada Limited, of Brampton, and Engine Control Systems Ltd., of Newmarket.

Alias Research won its award in the Innovation category for the develpment of Alias Designer, computer aided-industrial design (CAID) software that allows designers to generate photo-realistic prototypes and manufacturable milled models of new product design. The company has become a world leader in CAID technology, gaining a 50 per cent share of the market worldwide.

Cangene Corporation's award in the Invention category is in recognition of the company's development of a biotechnology process which amplifies nucleic acid and holds great promise for applications in diagnostic testing.

IBM Canada's Technology Manufacturing Plant in Toronto was honoured in the Productivity category for its strategy to shift from low-tech final product assembly to high-tech electrinic manufacturing and for tripling plant productivity and doubling revenue over a four year period.

Northern Telecom's Digital Switching and Customer Service Divisions were recognized in the Quality category for intensive dedication to quality in the manufacture and service of complex digital switching products. The divisions have reduced outages by 72 per cent and nonconformities by a factor of nine.

Mississauga firm gets AMTAP cash

MISSISSAUGA - The Honourable John McDermid, Minister of State (Privatization and Regulatory Affairs) and M.P. for Brampton, announced on behalf of the Honourable Benoit Bouchard, Minister of Industry, Science and Technology, that T an J Furniture Mfg. Ltd. of Mississauga, will receive $20,719 in federal assistance under the Advanced Manufacturing Technology Application Program (AMTAP).

The company will use the support under AMTAP to study and evaluate the potential impact that new information technologies can have on their operations, how it could improve their productivity and enhance their competitiveness in international markets.

AMTAP is a four-year service-oriented program of Industry, Science and Technology Canada. It has an $8.5 million fund to sponsor about 90 projects in each of its four years of operation. The program provides funding for qualified firms to engage outside consultants who will assess the commercial and technical feasibility of comprehensively upgrading their manufacturing operations.

The program supports projects from both individual and groups of companies. Where one company is involved, contributions can be provided of up to 75 per cent of the cost of engaging a consultant, to a total of $25,000. Where there is a demonstrated advantage to a joint application covering a group of companies, assistance could be up to 75 per cent of the consultant's cost, with a limit of $20,000 per firm up to a total limit of $200,000. Joint applications can be made by an association or corporation on behalf of a group of companies.

Canada's leading manufacturers are actively updating technologies and management practices to meet international standards. It has been found that a comprehensive assessment of the manufacturing operations, by consultants with relevant prior experience, can assist change and enhance the probability of success. Senior management's commitment in these companies is seen as critical to successful implementation and this is a prerequisite for financial support under the AMTAP.

New Corrigan product

Corrigan Instrumentation Ltd. of Georgetown, Ontario, has announced the introduction of a new product.

The 'CYANCOR' On-Line Free Cyanide Analyzer for use primarily in the Gold Mining Industry.

Gold bearing ore is finely ground, mixed with water and other chemicals includng Cyanide. The Cyanide chemically extracts the Gold for further processing.

By continuously measuring the amount of Free Cyanide in the circuit, it is possible to improve recovery of the Gold from the ore at considerable dollar savings, due to the reduced amount of Cyanide required to obtain optimum results.

Corrigan Instrumentation Ltd. will manufacture and market and CYANCOR Free Cyanide Analyzer worldwide.

The successful completion of this product has been made possible with the technical support of Energy Mines and Resources CANMET branch and financial support from the Federal Government's IRAP Program.

HEY FRED! Have you heard? Country Lane has opened a Pizzeria and they deliver to Terra Cotta, Norval, Glen Williams & surrounding area.
