This floor plan is designed for a home with the view to the rear of the lot. Numerous double French doors and wide picture windows opening to an expansive rear deck makes this area the focal point of the home and encourages outdoor living.

A deeply weather-protected entry opens to a skylit foyer which is visually zoned from the living room by a L-shaped plant shelf. The high vaulted ceiling living and dining room has twin French doors which flank the masonry fireplace. A U-shaped kitchen, with abundant counter space, eating bar and sunny breakfast room easily serves the dining room. A convenient laundry room connects the two-car garage with the kitchen and eases unloading groceries from the garage.

This design may be built with a basement or crawlspace foundation. (plans include both types of foundations.) The total finished floor area of this home is 1,640 square feet.
