

HOROSCOPES

March 10-16

ARIES - March 21/April 20
Hopefully you'll have taken a small step towards clearing a backlog of duties recently. Though contrary to your nature, it's good to force yourself to take care of tedious tasks. Make sure you don't fall into a routine however.

TAURUS - April 21/May 21
Home life continues to cause pain even though you're doing all you can to settle disputes or solve certain problems almost singlehandedly. But no matter how glum you may feel, one person will be swift to come to your assistance providing you make it clear that you'd welcome his/her affection.

GEMINI - May 22/June 21
Keep cool and calm this week because almost certainly those around you will be short of such qualities. While they are panicking and getting certain news completely out of proportion, you should be thinking how best proposed changes can be used in order to improve your life.

CANCER - June 22/July 22
Inwardly you may curse yourself for being soft but nevertheless you'll still show steadfast support for someone you care for even though it's obvious he or she is being utterly foolish. This loyalty will actually prove to be to your advantage. You could spoil something pretty by being neglectful.

LEO - July 23/August 23
Although you might feel a little lonely, continue to be true to your beliefs. At the moment your instincts are correct even though you can't explain why you're so convinced you're right. Left to their own devices you'll find those who seem so mocking will come around to you way of seeing things.

VIRGO - August 24/Sept 22
Moving behind the scenes is best this week. Don't let others pry. Some will assume they know all, anyway. Let them go on believing — you'll have the pleasure eventually of watching them squirm when they realize how wrong they've been.

LIBRA - September 23/Oct 23
Be prepared to gamble and take a few risks. It's by wheeling and dealing that you'll eventually strike a bargain that suits all concerned. But a brave and rather outrageous approach is essential. Others will be quick to spot the slightest hesitation

or uncertainty so be sure to stay cool at all times.

SCORPIO - October 24/Nov 22
You must tread carefully this week. The person you care for will be in a suspicious frame of mind so don't do anything that could make him or her feel you're hiding something. Bear in mind that if you don't go to extremes, neither will anyone else.

SAGITTARIUS - Nov 23/Dec 21
Beware of falling into the trap of believing all that's presented as fact. You should probe a little deeper and find out for yourself exactly what's going on rather than taking someone else's word for it. Yes, it will require effort and yes, it will mean treading on certain people's toes.

CAPRICORN - Dec 22/Jan 20
You must now recognise there's no going back where certain decisions are concerned. You've made them — now stick by them. Others, put out by your determination, may make rude comments but that's something to ignore.

AQUARIUS - January 21/Feb 18
This week, it will be all too easy for you to let the world go by without making a contribution. Fight that mood but keep your battle on a sensible level. Make a point or two but don't fall into the trap of brooding in silence then exploding in a way that makes those you want to impress think you've lost your mind!

PISCES - February 19/March 20
The fact that you are likely to achieve something very worthwhile will make this week important to you. The next few days might easily mark a major turning point for you. Changes are due to occur and they will inevitably pave the way for more settled conditions.

YOUR BIRTHDAY THIS WEEK:
The next twelve months

A somewhat confused and confusing year lies ahead when you could easily waste golden opportunities and fail to make the most of what life has to offer. Certain colleagues or associates appear to be doing their utmost to cramp your style and you may have to forget about being easygoing and charming. Try to concentrate on what's most important.

Easter bunnies

Easter isn't very far away and traditionally it's associated with rabbits and hares.

Although rabbits and hares look very similar, and are often mistaken for each other, there is a difference between them.

The easiest time to notice the difference is at birth. Rabbits are born blind, without fur, and cannot move about. Their eyes open in about a week, and when they are two weeks old, they are

able to leave their nest.

Newborn hares, however, are born with their eyes open. They have a coat of fine, soft fur and can hop about within a few hours of their birth.

As both animals grow, hares become larger than rabbits and have longer hind legs and bigger ears.

Hares can leap ten feet or more when they're frightened, and run as fast as 18 miles an hour. K3910001

Will you miss winter?

Vanesa Taberer, George Kennedy Public School: "No, I won't miss winter because it's cold and slippery."

Peter Egan, Petrolia: Yes, because it is fun. In winter I can ski, toboggan and slide on the snow."

John Lootsma, Georgetown District Christian School: "No, because its almost over and it'll come again next year."

Amazing facts about rats

Did you know that a rat can fall from heights of up to fifty feet and land on its feet without being hurt? It can also swim for days, and climb straight up the side of a building to the roof.

Rats can gnaw through wood, mortar, concrete, brick, and even metal!

Like other rodents, rats' teeth never stop growing. If the rat didn't grind them down daily, his teeth would grow back into his brain and kill him.

Rats aren't picky eaters either. They will eat any kind of food they find around. K3910002

CARRIER OF THE WEEK BOYS - GIRLS

Brad, 11, a Grade 6 student at McKenzie-Smith Public School in Acton, has been delivering the Herald for five months.

He delivers 76 papers on Wednesdays and Fridays.

Not one to save his earnings, Brad enjoys buying clothes and Nintendo games with his wages.

He likes building models and collecting baseball, hockey and football cards.

When he gets older, Brad hopes to be either a professional baseball player or a truck driver.

For his efforts, Brad will receive a large pizza courtesy of Queen's Pizza in Acton.

DID YOU KNOW?

by AL 468

IF THE SIZE OF YOUR HAT IS SEVEN IT IS BECAUSE THE LENGTH OF YOUR HEAD PLUS THE WIDTH OF YOUR HEAD ADDS UP TO FOURTEEN INCHES — YOUR HAT SIZE BEING HALF OF THIS.

LIGHT IS NOT ONLY "BENT" AS IT PASSES THROUGH WATER BUT SLOWED DOWN AS WELL. IT WOULD TAKE SIX TIMES LONGER FOR LIGHT AT THE SURFACE OF A SWIMMING POOL TO REACH THE BOTTOM THAN IT WOULD IF THE POOL WERE EMPTY.

THE JAPANESE SPIDER CRAB HAS A SHELL THAT MEASURES ABOUT 12 INCHES ACROSS BUT ITS CLAWS CAN EXTEND TO A SPAN OF AROUND TEN FEET!
