Rhodes returns to manage Miracle Mart

Dave Rhodes

Dave Rhodes, former Produce Manager at the Georgetown Miracle Mart, has returned to Halton Hills as the Manager after a four-year appointment at Bramalea City Centre Miracle Mart as Assistant Manager.

When interviewed last week Mr. Rhodes said he is looking forward to getting involved in Halton Hills and being an active part of the community. Mr. Rhodes likes the one on one contact that the Georgetown store provides and the friendly outgoing customers who take the time to stop and talk about the weather and sports.

Mr. Rhodes is looking forward to a long stay at the Miracle Mart store which employs 105 full and part time employees.

Lucky Winners

Eileen and Howard Ranger of R. R. 1 Georgetown were the lucky winners of \$250 in groceries in the Herald's recent find the mystery word contest running in the Homestyles section of the Herald. Bob

Creasy, Manager of Knechtels Georgetown Food Market, is shown turning over the \$200.00 in vouchers to the Rangers. (Herald photo)

Consulting service aims to inform

Because of increased public awareness of the danger of chemical pesticides, Moore Partners Ltd. has established a Non-Toxic Lawn and Garden Care Consulting Service, headed by Steven Moore.

"There certainly is a need for this service," says Moore. "My friends and neighbors are always calling me for advice on how to have a beautiful lawn, a productive garden, and at the same time a healthy family."

Moore has a Masters Degree in Environmental Studies, 10 years of experience in organic gardening, five years experience in organic fruit production, and a Member of Canadian Organic Growers. He has organized his experience, as well as extensive lists of organic suppliers, in order to share his knowledge with others.

"Most of us want to see our children playing on the lawn without worrying about their ex-

posure to toxic chemicals," Moore states. "There are many other alternatives to dangerous pesticides which don't take a lot of time and don't cost the earth. People just need to know what to do, when to do it, and where to purchase effective non-toxic products."

Moore's services will include personalized needs assessments, site planning, coaching, and demonstrations for beginners.

For advanced gardeners, Moore will provide assistance in diagnosing problems, and suggestions on prevention and treatment using organic methods.

Non-toxic methods include encouraging nature to work for you by providing habitat for beneficial birds and insects who will control pests on their own. These beneficials are often killed by pesticides, requiring continued use of pesticides to keep the uncontrolled pests in check.
