Weather protected entry opens to a sunken foyer with multipaned transom window which accentuates the high thirteen foot ceiling. Tray ceilings throughout the formal entertaining areas add distinction and increase the sense of spaciousness of the design. Stately, decorative columns adorn the sunken living room and provide visual separation from the dining room. The efficient kitchen is open to the sunny breakfast bay and

family room. The family garden features a corner positioned fireplace and French doors access to the garden patio.

The bedrooms are positioned away from the noisy traffic areas. The master bedroom boasts a cozy window seat, walk-in closet and ensuite with raised whirlpool spa and shower.

The two additional bedrooms, one which could easily double as a den, share a main three-piece bathroom with soaking tub. The finished floor area of this home is 1,785 square feet. Space for future expansion is easily accommodated in the full basement. Plans include a choice of foundations in-

cluding a full basement or crawl space.

Send for Canada's largest plan book with over 500 home plans, including a wide variety of architectural styles, from luxurious brick manors to affordable bungalows, only \$8.95 including shipping and GST.
