### ECOLINE

by Catherine Farley

Caring for Our Air

Burning more fossil fuels accelerates global warming. Glaciers and the South polar ice-cap melt, and sea levels rise.

If, as predicted, earth temperature goes up 3°C by year 2050, sea level would rise 1.2 m and a third of Florida would be under water...

...and 60% of America's wetlands would disappear.

Trees help prevent global warming by absorbing carbon dioxide -- a major greenhouse gas. Plant a tree and help save your favorite beach!
