... Lend Me Your Ears

HOW DOES LOUD NOISE CREATE HYPERTENSION?

It appears to affect the nervous system, signalling the peripheral blood vessels to constrict as though under attack/ This triggers a surge of adrenaline and other fight-or-flight chemicals into the bloodstream - a response that carries with it the potential for glandular or cardiovascular changes, in other words, unwanted noise creates the same final results as increased stress (try to avoid)!

THE VALUE OF A "SMILE"

It costs nothing, but creates much.

It enriches those who receive it, without impoverishing those who give it.

It happens in a flash, but the memory of it sometimes lasts forever.

It cannot be begged, borrowed, or stolen but it is of no earthly good to anyone, until it's given away!

So if in your hurry, you run across someone too weary to smile, Leave one of yours!

Because no one needs a smile as much as he who none to give.

Arthur unknown

Creating confident smiles since 1982.
