

MAY 8 & 9, 2010 HAMILTON CONVENTION CENTRE
1 Summers Lane, Hamilton ON

THE ultimate Me EXPO

Come Early!
First 1,500 people each day
will receive VIP bags

**Look Great, Feel Great
and Live Better!**

Health and Wellness, Mind, Body & Soul,
Fitness, Nutrition, Skin Care, Cosmetic
Enhancement and so much more!

**Mothers get FREE ADMISSION
on Mother's Day! REGISTER ONLINE**

SHOP • EXPLORE • SEMINARS • ONSITE DEMOS • TRY NEW PRODUCTS

ADMISSION: \$6 • PARKING: \$5 (FLAT RATE)
SATURDAY 10AM - 6PM & SUNDAY 10AM - 5PM

For more information on directions, parking and promotions: Call 289-337-8002 or visit us at

www.ultimate.me.ca

*2 for 1 ADMISSION

*Clip this coupon and bring with you to the Expo. Cannot be combined with any other offer.

Lexus has adapted its hybrid technology to a special bicycle concept with eight-speed transmission and carbon fibre frame. There are no plans to sell the bike.

Lexus designs Hybrid Bicycle

Lexus has established itself as an industry leader in bringing advanced technologies to the premium car market.

Now it has applied the same thinking on a smaller scale to create the Lexus Hybrid Bicycle, a design concept that captures the fundamental engineering and design values of the brand, but with two wheels rather than four.

There are no current plans for the Lexus Hybrid Bicycle to become a production model.

In every aspect this is Lexus, from the L-finesse design language of the engaging and elegant frame, to the application of hybrid power, an electric eight-speed transmission and lightweight carbon fibre construction.

Lexus has pioneered high performance, low emissions and optimum fuel efficiency with its full hybrid Lexus Hybrid Drive powertrain technology.

The Hybrid Bicycle adopts similar principles, with the pedal power of the

rider boosted by assistance to the front wheel from a 240W electric motor, via a 25.9V Lithium-ion battery, with a choice of Eco or Power modes.

And, as with Lexus Hybrid Drive, there is an energy regeneration function that helps recharge the battery by capturing kinetic energy generated under braking.

The Lexus Hybrid Bicycle has all-wheel drive, by means of a belt system.

It is equipped with an electric eight-speed Shimano internal gear system, which references the sophisticated eight-speed shift-by-wire automatic transmission of Lexus's LS 600h limousine.

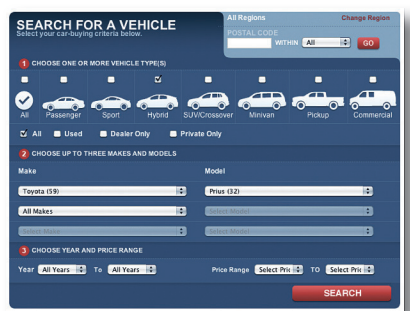

The carbon fibre construction shares the same light-but-strong composite materials technology that was used on Valentino Rossi's MotoGP-winning motorcycle.

It's easy as 1, 2, 3...

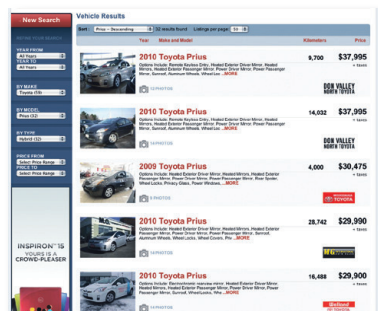

STEP 1

Search tens of thousands of vehicles.

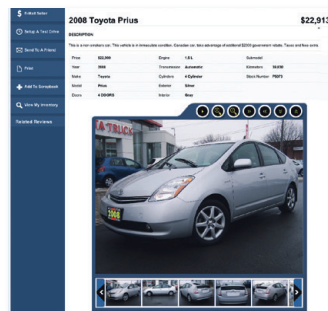

STEP 2

Refine your search by proximity, makes, models, price and more.

STEP 3

Review detailed vehicle descriptions and 360° views of each vehicle.

Find your perfect vehicle
at **Wheels.ca**.
