

... Lend Me Your Ears

By Cory Soal
R.H.A.D.

COUNSELLING THE NEW HEARING AID USER

The following few tips, if followed correctly, will prolong the benefits and enjoyment of better hearing:

- Do not get the hearing aid wet
- Do not leave the instrument where it is too hot or cold
- Try not to drop the hearing aid
- Do not spray cleaning solution or hair spray on the instrument
- Keep the instrument and batteries out of the reach of small children and especially pets

If any of the above problems do occur, please don't hesitate to call...

SORE AREAS

Periodically, your denture may cause some tissue discomfort. If you should develop a sore area, please call our office, but continue to wear the denture so we can pinpoint the source of the problem. We will make the necessary adjustments for you.

After the initial adjustment period, soreness may still occur occasionally. Leaving the denture out of the mouth for a short time will normally eliminate this problem. A warm salt rinse (1 teaspoon to a glass of water) will be helpful.

Be careful when handling your denture. Always store it in water to prevent the plastic from distorting. The denture may warp if left dry for long periods of time.

Think positive! You should expect soreness. This is natural. Be determined to wear the denture comfortably. You will adjust to your new denture.

Remember, you do not need a referral; simply call our office direct to make an appointment.

Creating confident smiles since 1982.
