**GEORGETOWN Denture Clinic**

**ABOUT OUR CLINIC:**  
 Since 1982, our office has been a trusted name in providing quality and integrity in the field of denture construction.

You will always receive that extra personal attention and commitment to your satisfaction.

With this individual attention, fewer dentures will end up in the bottom drawer. For many years, we have been licensed to serve you DIRECTLY. We are the only profession that spends 100% of our day specializing in the fabrication of dentures. We make new dentures, relines, repair, clean and adjust existing dentures, as well as counsel denture patients about various denture problems. We make everything from start to finish in our own lab that is located right on the premises. There is no "middle man" that can boost costs. We work directly with the patient, and every stage of denture construction is explained. Special attention is given to that type of teeth used, as well as the specific colour and shape that's right for you. The result is a custom cosmetic denture.

Our office does not charge for consultation. If your dentures are loose, bothersome, damaged, or if you just want a check-up, don't hesitate to call our office for a free, no obligation consultation. We would be happy to discuss any concerns or questions you may have regarding your dentures. We are your "Denture Specialist", here to serve you.

### HOW DOES LOUD NOISE CREATE HYPERTENSION?

It appears to affect the nervous system, signalling the peripheral blood vessels to constrict as though under attack/ This triggers a surge of adrenaline and other fight-or-flight chemicals into the bloodstream - a response that carries with it the potential for glandular or cardiovascular changes, in other words, unwanted noise creates the same final results as increased stress (try to avoid)!
