The staff at Alex Trenton's office have written a Christmas Carol and dedicated it to him! Sung to the tune of "WINTER WONDERLAND" "DENTURE WONDERLAND"

Appointments made, soon you'll have them
Your new teeth, you've been wanting
A beautiful taste
Without any paste
Wearing your new teeth from Alex 'T'!

Gone away, are the old teeth
Here to stay, are the new teeth
Alex makes them fit great
You're old ones you'll hate
Chewing in your denture wonderland!

In the days ahead, you'll need adjustments
Just to double check they're fitting right
Your mouth might get a tender little sore spot,
But Alex will fix you up and make you bite!

Later on, we'll recall you
To make sure, you can still chew
If everything's fine,
You'll skip your reline
And keep smiling in your in your denture wonderland!

Creating confident smiles since 1982.

... Lend Me Your Ears

NOISE INDUCED HEARING LOSS (NIHL)

There are several things that determine whether or not a sound can damage your hearing, including the loudness of the sound and the duration of exposure. Hearing loss can occur as a result of a one-time exposure to a loud sound, or repeated exposure to loud sounds. However, some individuals will be more susceptible to NIHL and there is really no way to tell who these individuals are:

Sounds louder than 80 decibels (dB) are considered dangerously loud and could potentially cause a NIHL. Below is a list of the dB level of some sounds that may be encountered during the course of a day.

- 60 dB Average conversation level
- 70 dB Vacuum cleaner
- 80 dB Alarm Clock
- 90 dB Lawnmower
- 100 dB Chain saw
- 110 dB Rock Music
- 120 dB Jet during take-off
- 130 dB Jackhammer
- 140 dB Firearms

At the Georgetown Hearing Clinic we specialize in custom fitted hearing protection.
