**A TRUE 4 SEASON TIRE!!!**

**nokian**  
ALL-WEATHER PLUS

**905.877.8220**

A third generation in Nokian Tyres' unique line of "All-Weather Plus" tires, the new Nokian WRG2 and WRG2 SUV offer the best performance in every season. The shape and siping of the outer shoulder make the tires easy to handle in the most extreme conditions, and are excellent on dry roads, even at high speeds. So while seasons may change, your choice of all-weather tires remains the same: Nokian WRG2 and Nokian WRG2 SUV.

Nokian Tyres' All-Weather Plus line exceeds the new government standard for tire performance in harsh winter conditions.

**Make sure you can see and be seen**

Lights and wipers play a major role in safe driving, as the chance of an accident increases if you can't see or be seen. The wiper system keeps excessive water, snow and dirt from building up on the windshield, maintaining clear visibility. The lighting system provides nighttime visibility, signals and alerts other drivers, and supplies light for viewing instruments and the vehicle's interior.

"It's important to make sure others can see your vehicle and your visibility is not compromised," says Patty Kettles, Manager, Marketing & Communications at the Automotive Industries Association of Canada. "During normal driving, you may not notice a light that isn't working, so be sure to inspect your car's lights at every oil change. At the same time, inspect and replace wiper blades so you can see clearly when wet weather hits."

Lights are normal wear items that require periodic inspection and replacement. In addition to replacing dimming, rapidly blinking and non-functioning lights, the following tips can help keep you safe:

- Keep headlights, tail lights and signal lights clean. External dirt and debris can dim operational lights from being seen by others.

- Make sure that your headlights are properly aimed. Mis-aimed headlights blind other drivers and reduce your

ability to see the road.

- Don't overdrive your headlights; you should be able to stop inside the illuminated area, otherwise you are creating a blind crash area in front of your vehicle.

- If there is any doubt on whether or not your headlights should be on, turn them on. Lights not only help you see better in early twilight, they also make it easier for other drivers to see you.

Many factors can accelerate the replacement interval of wipers, including operating conditions (winter conditions are tough on wiper blades), frequency of use, material and type of wipers and sunny weather. In fact, wiper blades can deteriorate faster and need more frequent replacement in hot weather.

If you detect any problem with your car's lights or wipers, have them checked out at once. Keep your vehicle's lights properly cared for to help ensure a safer ride and keep the road ahead well-lit.
