

Region ready to rumble (strips) on Trafalgar Road

Residents say intersection changes will help, but add the process is 'too slow'

Continued from pg. 4

coming to an intersection. A centre median island is planned as they approach the intersections. In the same area there are to be oversize speed limit signs and speed display boards that tell drivers how fast they're going. A "Prepare to Stop" sign is to be posted for southbound traffic.

Transverse bars are to be painted on the roadway ahead of the islands to "help give drivers a reference to how quickly they're going."

At Five Sideroad a west-bound left turn lane is planned along with eastbound left and right turn lanes.

At 10 Sideroad an east-bound right turn lane is to be added, and north and south-

bound there are to be additional right turn lanes.

Following a suggestion by area resident Rob Heaton at the meeting, Malone said they will look at the possibility of extending the right-turn lane at Maple Ave./17 Sideroad intersection as well to ease congestion there, especially when traffic is backed up because of trains.

Laurie Jeffery, a Thompson Rd. resident, said adding lanes at the intersections, "will absolutely help," but didn't have much faith that the pavement markings etc. would slow drivers down.

"In some areas it will improve the movement of traffic, but it may impact on properties more than what they are

aware of," said Doug Birnie, a Trafalgar Rd. resident, of the planned improvements.

John Rainville, also of Trafalgar Rd., said, "the process is too slow."

"By the time the Region does anything it's years be-

hind the problem," said Rainville, who has difficulty getting out of his driveway due to traffic.

He does think the intersection improvements will help and hopes synchronization of the lights will as well.

Murder suspect granted bail

Acton resident Eddie McGuin, charged with second degree murder in the death of another Acton man earlier this year, was granted bail in Superior Court in Milton Friday.

McGuin was charged in the death of Rick MacLeod, 49, who Halton Police said died following an altercation in a Mill St. apartment Jan. 6.

McGuin is to be back in court on Monday, March 21.

WHO ARE DENTURISTS???

Denturists have been serving the public directly in Ontario since 1974, when legislation was enacted to govern and license our services!

A Denturist's practice is devoted solely to the fabrication, relining and repairing of dentures. You can go directly to a Denturist for treatment without a referral from another health care practitioner. They do not work for dentists. Dentists send their work out to commercial labs, not to Denturists. Denturists provide the most cost and time effective service. Unlike other health care practitioners who provide dentures, Denturist's laboratory work is done in-house on the premises and all done by the Denturists who sees the patient chair side. The result is a custom cosmetic denture that is made to suit only you. Specially made to fit your exact face contour and colouring. A very natural looking denture. No middle-man, no sending work out. All work is done right here in our state-of-the-art dental lab. Because dentures are all we do, we do it right!

Denturists are uniquely qualified to provide quality, custom dentures. They are highly skilled in the clinical and laboratory aspects of making dentures. They perform both jobs and have first hand experience working directly with the patient! Remember, you do not need a referral from your dentist. Simply call our office direct for an appointment. We do not charge for consultations. Let us make a lasting impression!!

Creating confident smiles since 1982.

... Lend Me Your Ears

By Cory Soal R.H.A.D.

You have probably heard recently, that legislation has been passed that will target drivers using cell phones while operating a motor vehicle. We all know that distractions are a dangerous combination and common part of driving on today's congested roadways. Any way to lessen the number of distractions faced daily would greatly help one to focus on the task at hand, and get on with their day. At the Georgetown Hearing Clinic, we do not condone the use of cell phones while driving, but when absolutely necessary, a hands free device, such as a speaker phone, line Onstar™ or a bluetooth connected earpiece can be very useful and help reduce distraction - not to mention allow the driver the use of both hands.

At The Georgetown Hearing Clinic, we provide a wide variety of custom fit and non custom fit bluetooth hands free devices.
