

Synthetic Ice Solutions of Canada Inc.

Spring is coming and the hockey season is far from over, but competitive hockey players - and their parents - know there is no such thing as an off-season when it comes to training for their sport. Parents have spent many an hour in the car, ferrying their young hockey enthusiasts to arenas for off-season training. Wayman Harten wants to cut down on all that wasted time with his company, Synthetic Ice Solutions of Canada Inc.

Synthetic ice is perfect for hockey players and figure skaters.

The business, which has moved to a larger production Facility in Brampton, sells interlocking Synthetic Ice panels that can be placed on any flat, stable surface to create an instant ice-like training surface. Kids and adults alike can strap on their skates and train the way they would on real

ice without worrying about damaging their blades or the synthetic ice surface.

Each synthetic ice panel measures approximately four feet by four feet with a thickness that ranges from one-quarter of an inch to three-quarters of an inch depending on your budget. The interlocking, reversible panels can create a temporary or permanent training surface in the basement, out on the deck or on the driveway, and can be used all year round. At the end of the session, the panels can be taken apart and stored if needed.

"It's a great alternative for kids who need to train anytime," considering Ice time is so hard to come by in the Halton Region or surrounding area's says Wayman, "Instead of sitting in the cold of an arena, or trying to find one, training can now be done in the comfort of your own home. It saves time and money and gas."

Synthetic Ice has the added benefit of being a green product as well. Skaters will get 7 to 10 years of use out of a single side of the panel, then they can flip it over and get another 7 to 10 years out of the other side. At the end of their lives, the panels can be recycled. Also unlike regular ice surfaces, synthetic ice requires no electricity, refrigeration or water. But the product's biggest draw, Harten says, is having such a great training tool at your disposal when you want it!

"It helps people get back in control of their schedule," he says. "It's designed for family and fun, it will make you the hit of the neighborhood! Wayman is also proud to announce

that his Companies Ice has been accepted on a World Wide scale, after just shipping an 85' x 185' surface to Bulgaria this month, Towns & Municipalities alike are also seeing value in his Companies product as one of his surfaces is now set up in front of City Hall in Taunton MA, USA.

Wayman does want to remind people though, our product is not readily available off any shelf, so do not be fooled by imitation products in the market place.
