Transportation Master Plan to 2031 – The Road to Change PR-2414

Background

Halton Region has initiated a Transportation Master Plan (TMP) – *The Road to Change* to develop a sustainable, integrated transportation plan and associated strategies that consider all modes of travel (automobiles, transit, cycling, walking) to the year 2031.

Problem Statement

The Master Plan will provide the strategies, policies and tools required to meet the Region's transportation needs safely, effectively and cost efficiently.

The Process

This Transportation Master Plan is a study which defines existing problems/opportunities, considers and evaluates solutions, and will identify an optimum transportation system to the year 2031. A

key outcome of the study is a list of transportation projects that the Region can incorporate in its 20-year Roads Capital Program. To comply with the Environmental Assessment Act, the study is being conducted in accordance with the Municipal Class Environmental Assessment (EA) process (October 2000, as amended in 2007).

The first round of Public Information Centres were held March 2010 to present the study background, vision, guiding principles, and problems and opportunities. Thereafter, a preferred transportation strategy was determined taking into consideration comments that were received from the Local Municipalities, regulatory agencies and the public. A second round of Public Information Centres has been arranged to review the preferred transportation strategy and receive comments from the public.

Change your smoke alarm batteries

Change your clocks, change your smoke alarm batteries.

It's time once again on Sunday to move the clocks forward an hour (daylight time) and put new batteries in your smoke alarms. At the same time it's a wise idea to test the smoke alarms to ensure they're working, and dust, clean and vacuum the alarms.

Fire Chief Brent Marshall says only a working smoke alarm provides the extra few precious seconds that may be needed to escape a fire. Working smoke alarms save lives, reduce injuries and fire loss.

"With the minimal costs of smoke

alarms today, there is absolutely no reason why every resident of Halton Hills doesn't have working smoke alarms in their home," said Marshall.

The law requires smoke alarms on each level of the home, including the basement.

Fire Department staff members are happy to speak to residents about smoke alarms or fire safety. They are available to visit people's homes to assist with locating the proper place to install smoke alarms. For more information call 905-873-2601 ext. 2115—Capt. David Ford, or Capt. Doug Andrews at ext. 2209.
