## Introducing Time-of-Use rates. *Starting June 1, 2011*

A new way to better manage your electricity costs,  
help the environment & ease the strain on our system.

Ontario is introducing new Time-of-Use rates to help smooth "peak demand". With rates based on off-peak, mid-peak, and on-peak periods, you can now decide when and how to best use your electricity. So if, for example, you run your dishwasher and laundry

\* Note: rates will be updated on May 1, 2011.

after 7 pm and on weekends (off-peak) you'll pay a lower rate. "Off-peak" use will also reduce the strain on our system and help the environment by reducing the need to build excess electricity plants and transmission towers. For more information call or visit our website.
