### SPECIALIZING IN PROBLEM LOWER DENTURES

#### 5 COMMON COMPLAINTS:

1. Why are lower dentures more difficult to get accustomed to?
2. Why do my lower dentures always move around or slip out?
3. If I keep my dentures out at night, will my face sag?
4. Why do my teeth click when I chew?
5. Why can't I get used to the lowers? I wear them in my pocket!

If you find yourself asking these questions over and over again, you're not alone. We specialize in problem lower dentures and we understand your problems, and we can offer many solutions. To see if we can help call us for a free, no obligation consultation.

You do not need a referral; simply call our office direct.

## ... Lend Me Your Ears

By Cory Soal  
R.H.A.D.

You have probably heard that legislation has been passed that targets drivers using cell phones while operating a motor vehicle. We all know that distractions are a dangerous combination and common part of driving on today's congested roadways. Any way to lessen the number of distractions faced daily would greatly help one to focus on the task at hand, and get on with their day. At the Georgetown Hearing Clinic, we do not condone the use of cell phones while driving, but when absolutely necessary, a hands free device, such as a speaker phone, line Onstar™ or a bluetooth connected earpiece can be very useful and help reduce distraction - not to mention allow the driver the use of both hands.

At The Georgetown Hearing Clinic, we provide a wide variety of custom fit and non custom fit bluetooth hands free devices.
