Unique gardens that turn neighbours green with envy

When creating a backyard, balcony or patio garden, use plants that provide contrast and an element of visual appeal.

For gardens that are anything but ordinary, move away from the traditional plants and experiment with varieties a little less well-known. Visit your local Lowe's stores (Lowe's.ca) to discover a variety of Garden Treasures brand plants that offer vibrant displays of colour. Some options to consider include:

Red Spike- easy to plant and resilient, the tropical-like foliage produces lush, dark red leaves that never fade and flourishes in full sun.

Espalier Apples- grown on a trellis, these trees can be used against a fence, a wall or near a patio. Once the fruit begins to grow, the various apples

act as a stunning complement to surrounding foliage.

Hydrangea Glowing Embers- fragrant and good for cutting, these plants are easy to care for and feature large flowering heads that are crimson and purplish in colour.

Butterfly Bush Black Night Flowers- with the darkest blossoms of all the Butterfly Bush Cultivars, this plant's fragrance has been known to attract butterflies, bees and birds.

Assorted Fruit Bushes- not only do fruit bushes produce an edible summer treat, they offer great colour. Mixed in amongst different varieties and vegetables in a decorative container or garden makes a great showpiece sure to draw attention.
