# Create the perfect summer escape without leaving home

When it comes to spending time outside, make the most of the space you have. Whether you have a small yard, simple patio, elaborate deck or sprawling backyard and garden, visit a one-stop shop such as Lowe's (lowes.ca) where you'll find everything you need to get started and create your dream outdoor escape. Keep the following in mind when compiling that important outdoor shopping list:

**Invest in lighting.** Make the warm, spring evenings last even longer with outdoor lighting. Look for lights with dimmers for a muted effect. Solar lighting is another great option – they require no wires and are easy to install.

**Add privacy.** Create a secluded feeling by adding beautiful outdoor fabric panels, movable screens, or solid wood fencing.

**Choose durable goods.** All-weather patio furnishings are essential for outdoor living. They hold up to the elements, but still look good. Look for sets that feature hand brushed finishes, rust-free frames and UV-protected fabric.

**Add comfort.** Decorate your outdoor space to make it as comfortable as your indoor spaces. Look for colorful outdoor rugs and durable all-weather fabrics.

**Multitask.** Make the most of your space with multifunctional furniture. Look for coffee tables that double as beverage coolers or deck boxes that keep clutter at bay and act as a convenient place to store outdoor must-haves.

**Show off.** Highlight your yard's best features. If you have a beautiful garden or great views, arrange seating so you can enjoy the landscape.

**Include flowers.** Container gardens are a good way to grow fresh, organic herbs and vegetables in a limited space. Planters can be coordinated with patio furnishings and go a long way in creating a vibrant look without the commitment typically involved with keeping up a garden.

**Personalize.** Today's modern furnishings allow you to create the look and feel of the outdoor space you desire. If you crave peaceful afternoons reading and relaxing, invest in loungers, hammocks and gliders for a serene backyard oasis. If you have a love for entertaining, glam your space up with gazebo chandeliers and formal dining sets such as the Dellinger, available at Lowe's. With everything available from grills to outdoor kitchens, bistro tables and chairs to formal dining and conversation sets, anything goes!
