blue drive 2011 Sonata Hybrid

KEEP THE SKY BLUE AND YOUR WALLET GREEN.

The 2011 Sonata is the first Hybrid to feature lithium polymer batteries – the smallest, lightest and most advanced hybrid batteries in the world. It's just one part of our investment in eco-friendly technologies called Blue Drive. With an impressive 206 net horsepower, proprietary 6-speed automatic transmission, panoramic sunroof, and LCD trip computer, the Sonata Hybrid feels more like driving a conventional automobile. After all, just because you care about the environment, doesn't also mean you don't care about a great driving experience.
