

# Your Child's Eyes Deserve an Optometrist

Good vision is an important part of learning. Help your child succeed by having their eyes examined by an optometrist.

- 80% of classroom learning is done through the eyes
- 1 in 6 children have some form of vision problem
- Children with poor vision often find it difficult to focus on their work and may be misdiagnosed as having a learning or behavioural disability
- Good vision is vital to developing skills such as reading, copying and hand eye coordination
- Eye examinations by an optometrist are covered annually by OHIP for children 19 years of age and under

## Halton Optometrists Helping Young Learners

October is Eye Health Canada Month and local optometrists are hoping to examine as many pairs of Junior Kindergarten eyes as possible over the current school year to make sure they are ready to learn. Junior Kindergarten students enrolled in publicly funded Halton schools are eligible to receive a comprehensive eye exam, and if required, a free pair of eyeglasses courtesy of the Eye See...Eye Learn program.

**"Last year, for 78% of the children participating in the program, it was their first eye exam and over 140 children received free glasses."**

There is no cost to participate. Simply visit [www.EyeSeeEyeLearn.ca](http://www.EyeSeeEyeLearn.ca) or call toll free 1-855-424-ESEL (3735) to find a participating optometrist. Present your child's valid health card at the time of the exam. The glasses are generously donated by industry sponsors and local optometrists. The program is operated by the Ontario Association of Optometrists and is funded in part by the Government of Ontario.
