### View hot metal garden art

Metalscape, the studio of award-winning Doris Treleaven, is having a Mother's Day weekend Open House, May 12-13. Enhancing gardens with some original life long metal art is fast becoming the new trend, says Treleaven, as people are expanding their creativeness in their gardens. She will be demonstrating how she creates some of her pieces. Her work can be seen around the town, including two earthy vine fireplace screens at the Acton Library. The Metalscape's Mothers Day Open House will be held 10 a.m. to 4 p.m. both days at the studio, 13016 Fifth Line, Limehouse, south of Hwy 7 between Acton and Georgetown. Info: 519-853-9743.

### NOTICE OF PESTICIDE USE

The Halton Region Health Department monitors standing water and catch basins in urban areas on public lands in The City of Burlington, The Town of Halton Hills, The Town of Milton, and the Town of Oakville for mosquito larvae. When mosquito larvae are found, the Health Department uses larvicide to control mosquito larvae in order to reduce the incidence of West Nile virus in Halton. Larvicide will be applied by a licensed applicator contracted by the Region.

#### Larviciding in Standing Water

Larviciding of standing water may occur anytime from May 16 to October 31, 2012 once monitoring indicates that mosquito larvae are present. The Halton Region Health Department will apply larvicide to standing water sites under the direction of the Medical Officer of Health, Dr. Bob Nosal. The biological larvicide VectoBac 200G (PCP# 18158, granular) or VectoBac 1200L (PCP# 21062, liquid) will be placed in affected standing water on public lands in urban areas in The City of Burlington, The Town of Halton Hills, The Town of Milton, and the Town of Oakville. Signs will be posted at each location indicating when the larvicide is applied.

#### Larviciding in Catch Basins

Larviciding of catch basins may begin anytime from June 1 to October 31, 2012 once monitoring indicates that mosquito larvae are present. The Halton Region Health Department will apply larvicide to catch basins under the direction of the Medical Officer of Health, Dr. Bob Nosal. The larvicide Altosid Pellets (PCP# 21809, pellet) or Altosid XR Briquets (PCP# 27694, ingot) will be placed into catch basins in urban areas on public lands in The City of Burlington, The Town of Halton Hills, The Town of Milton, and the Town of Oakville.

For the locations and dates of treatment please visit our website at [www.halton.ca/wnv](http://www.halton.ca/wnv). For more information about West Nile virus, please dial 311.

Please let us know as soon as possible if you will have an accessibility or accommodation need at a Halton Region hosted event or meeting.
