Me Your **Ears** The IFP Halton Hills, Tuesday, June 19,

HOW DOES LOUD NOISE CREATE HYPERTENSION?

It appears to affect the nervous system, signalling peripheral blood vessels to constrict as though under attack/ This triggers a surge of adrenaline and other fight-orflight chemicals into the bloodstream - a response that carries with it the potential for glandular or cardiovascular changes, in other words, unwanted noise creates the same final results as increased stress (try to avoid)!

We care about your hearing!

Professional Arts Building 99 Sinclair Ave., Suite 210 Georgetown (905) 873-6642

Does your child want to have lots of fun this summer?!!!

During each weekly theme-based session activities planned will include creative crafts, science, academics, organized outdoor activity, waterplay, cooking & daily outings in the community. Each week the children will have a bowling or splash pad outing & a planned field trip. Children registered will receive a summer camp package, which includes calendar of events, daily schedules, registration forms & more!
