

The flavoured baits immunize most skunks, foxes and raccoons that eat them. Baits are small and khaki green, with a toll-free rabies hotline number stamped on them. Exposure to a bait is not harmful to people or pets, however, if you see baits, please leave them undisturbed.

Rabies bait program begins this week

Approximately 280,000 wildlife baits containing a rabies vaccine will be distributed in southwestern Ontario—including Halton Hills—this week.

The bait drop program is one of the most successful wildlife rabies eradication programs in North America. The vaccine will control the spread of rabies in skunks and foxes and help continue to keep Ontario's raccoons free of rabies. Ontario raccoons have been free of rabies since September 2005.

Last year marked the lowest number

of rabies positive cases in the province since the disease became established in Ontario in the late 1950s. Ontario has reduced rabies cases in the province by more than 99 per cent since the rabies control programs began more than 20 years ago.

The flavoured baits immunize most skunks, foxes and raccoons that eat them. Baits are small and khaki green, with a toll-free rabies hotline number stamped on them. If you see baits, please leave them undisturbed.

Baiting also took place this summer in the Niagara Peninsula and on the St. Lawrence Islands and in the area of the St. Lawrence River.

Exposure to a bait is not harmful to people or pets. However, if a person or a pet comes in contact with the vaccine in the bait, contacting a doctor or veterinarian as a precaution is recommended.

Copper stolen

Halton Regional Police report copper wire and copper piping valued at about \$450 were stolen from an unlocked shed at a Regional Rd. 25 residence in Acton sometime Friday between 4 and 7 p.m.
