

EARTH DAY, EVERY DAY

A HEALTHY LAWN IS . . .

Don't bag it...see pg. 17

the Water Purifier

Lawns help purify water before entering ground water. Its root mass and soil microbes act as a filter to capture and break down many types of pollutants.

the Oxygen Giver

A lawn area of just 50-feet by 50-feet absorbs carbon dioxide and releases enough oxygen to meet the needs of a family of four.

the Air Conditioner

Front lawns of just eight average homes have the cooling effect of about 70 tons of air conditioning, while the average home size central air unit has only a 3 to 4 ton capacity.
