GREEN THUMB GARDENING

By **CHRISTINE COLE**

FALL PRODUCT PREVIEW

The fall season is quickly approaching and with it comes the task of protecting plants from possible water damage and planting spring flowering bulbs. The following is a list of products that will make these jobs easier and faster.

WINTER WRAP is a plastic mesh tube that can be reused for several years to protect upright junipers from damage caused by freezing rain and heavy snowfalls. It holds the branches close together, thus preventing branches being pulled down and damaged or mishaped. It is white in color and therefore barely noticeable when placed on the juniper. Each package contains enough mesh to wrap 3 to 5 average sized evergreens.

ROSE COLLAR(S) are a plastic device that makes the job of heeling up rose bushes in the fall, a simple and effective task. They are made of flexible green plastic that snaps together around the rose bush. Then all you have to do is fill the container up with dry soil or organic material to protect the bush. Rose collars are available in various sizes, but I would recommend the largest ones since they hold more filler and will therefore provide more insulative value to the crown of the bush.

BULB PLANTER(S) are an unusual tool that makes planting fall bulks a breeze. They are a metal open-ended cone with a handle. You simply push it into the soil to the desired depth for the bulb you are planting, then pull it back out. Voila! You are left with a hole to set the bulb in. Then just shake the soil from the planter back into the hole, on top of the bulb. I find that they are excellent for planting flowering annual plugs too.

Each week Christine Cole of Tuitman's Garden Centre and Landscaping, Highway 25, 1 mile south of Acton, 853-2480, will be presenting helpful tips and information to assist you in creating your garden show-place!
