**RESCUE BREATHING: 6 BASIC STEPS**

1. Shake and shout gently. Shake the person to see if he is conscious. Ask, "Are you OK?" If there is no response:
2. Call for help and tilt the head back gently, lift the chin to open the airway.
3. Look, listen & feel. Look at the chest to see if it is rising and falling. Listen for the sound of breathing. Feel for air escaping the mouth with your hand or cheek. If you cannot see, hear or feel breathing:
4. Pinch the nose and make a seal with your mouth on the victim's mouth and give two full breaths.
5. Turn your head and look, listen and feel.
6. Give a breath every 5 seconds. Continue until someone takes over from you.
