Turf Tips

Duncan Atkinson
Eileen Atkinson

SPRING CLEAN UP

This winter was one of the worst we have had in years. It has also taken its toll on your lawn. The months of snow has provided a good home for moles and mice while allowing Pink Snow Mold to discolour the grass.

The first step in getting your lawn off to a good start, is thorough raking with a good, stiff leaf rake. Use a leaf rake rather than a steel garden rake because the garden rake will tear away too many parts of the turfgrass plants during this time of year.

A thorough raking (including mole/mice damaged areas) will remove the surface accumulation of old leaves and twigs from the fall and winter and help prepare the damaged areas for seeding. Spring raking will allow air and light to reach the turfgrass plants to rejuvenate them. This freshly raked grass is ready for your first fertilizer application.
