**CVCA
bans
alcohol**

The Credit Valley Conservation Authority is promising a return to the quiet outdoor family experience originally intended for its campers at the Terra Cotta Conservation Area in 1993.

One of the new regulations to curb unwanted behavior is a ban on alcohol consumption in the campgrounds. The new regulations were passed at a meeting of the full authority last week and are designed to stop alcohol abusers at the park.

The new regulations follow the lead of all provincial parks who banned alcohol a number of years ago.

"We will be ticketing and ejecting anyone from the park who consumes alcohol and causes a disturbance," says Ken Owen, Land Resources manager for the Credit Valley Conservation Authority.

"We want campers to know that their camping experience is our number one priority and we will be working hard to maintain a positive camping atmosphere at Terra Cotta," says Owen.

Terra Cotta offers a beautiful natural area with hiking trails, fish ponds, swimming pool, barbecues and picnic areas. Camping at Terra Cotta opens May 21, 1991. For reservations please call (416) 877-9650.

**Hospital
volunteers
offer service**

By DOROTHY BODNAR

Special to the Independent/Free Press

The Volunteer Association of Georgetown and District Memorial Hospital has started an Information and Patient Escort Service in the lobby between 10:30 a.m. and 1:30 p.m. Monday to Friday.

A friendly face and greeting will now help visitors needing directions to patients' rooms, ICU or Day Surgery, or out-patients looking for x-ray, lab., mammography, admitting etc.

Patients being discharged often need assistance with wheelchairs, heavy doors, or getting into a car, while new parents need an extra pair of hands with taking home a baby, car seat, gifts, flowers and balloons.

The new service is being very well received by visitors, patients and staff, and even the volunteers are enjoying the new friendly atmosphere of the lobby.

The volunteers also provide service in two gift shops, hairdressing, ward work, baby photos, rehab portering and pharmacy. We welcome new people to expand these services.

**Library has
videos on waste**

Is garbage getting you down? The Georgetown Public Library has just received a series of videos on the waste crisis. These videos will encourage you and your community to find creative solutions to waste problems.

The videos were produced by Dr. Paul Connett, a chemistry professor at St. Lawrence University in Canton, New York and Roger Bailey who is also a professor at St. Lawrence University. Topics include incineration, ground water contamination, and composting plus many, many more interesting topics.

The series of videos was generously donated by Wastewise and is currently available at Georgetown Library. If more information is needed on how to acquire these videos for your local library please contact Wastewise at 873-8122.
