## INTELLIGENT INVESTING

with  
**CARY LEON**

### KEEPING YOUR YIELD UP

With interest rates at 25 year lows, many investors are finding themselves being shocked into the nineties with a tremendous drop in the income being generated by their investment dollars. Today I would like to make you aware of an investment that will allow you to generate superior quarterly income with excellent long term capital appreciation.

MacKenzie Financial Corporation's Industrial Income Fund is an investment portfolio which is primarily invested in high grade government bonds with the balance being invested in blue chip Canadian stocks. By changing the asset mix subtly, the manager can shift assets to take advantage of changing market conditions.

One of the most appealing aspects of the Industrial Income Fund is that it pays investors .25 quarterly in the form of a dividend based on the current unit price. This represents annual income of approximately 10.40%. Investors can choose to take their quarterly income in the form of cash payments or have them reinvested in more units. For those looking for income payments this amount is significantly higher than the income currently being offered by traditional investments.

In closing, Industrial Income Fund provides investors with a low risk method to maintain high current income and is also a 100% eligible investment for self directed RRSP's.

Further important information including a simplified prospectus may be obtained by contacting the author.

**Cary Leon & Mike Phillips** are a full service financial advisors with First Marathon Securities and can be reached at 855-7147 or 855-8266. Call today and inquire about the "NO-FEE" self directed RRSP.
