

Owners of Touch of Class Kitchens since 1980, Robert and Giselle Charette, have formed a new partnership with Lakeview Flooring owner, Bob Tremblay. The threesome will provide complete decorating consultations from planning to installations. They offer carpets and flooring from Peerless, Barrymore, Columbus, Richmond and

Armstrong and will continue to carry Our Craft Kitchens and New-View Blinds. They will also soon be offering complete window services. They posed October 23 for the official ribbon-cutting ceremony with Bob Tremblay on the left with Mayor Russ Miller and Robert and Gisele on the right.

### DENTAL MATERIALS

Charles Goodyear invented a denture base material back in the mid 1800's. This material was called "Vulcanite". Vulcanite is a dark brown, semi-rigid rubber. Since then, denture base materials have come a long way and vast changes and improvements have been made. Today very modern plastics and acrylics are used.

The artificial teeth on a denture were made from such materials as bone and ivory. Precious metals such as gold and silver were also tried. Even wood was used to make teeth!

Finally, porcelain and plastic teeth have replaced the former materials. We've come along way since the days of "wooden teeth". Denture technology has been vastly improved for denture wearers, and they are continually discovering new techniques and materials.

Today, more than 5 million Canadian adults are wearing dentures. That's more than one out of every four people in Canada.
