

# Can Thermo-2000™ make reshingling obsolete?

- Old Shingles:**
- Weatherworn
  - Cracked and loose
  - Curled ends
  - Discoloured
  - Allow water penetration

- Thermo-2000™.**
- Stops leaks
  - Reduces energy costs
  - Renews appearance
  - Protects against sun
- SAVE UP TO 1/2 ON THE COST OF RESHINGLING**

**PROVEN EFFECTIVE IN THOUSANDS OF GOVERNMENT, COMMERCIAL AND RESIDENTIAL APPLICATIONS**

**Thermo-2000™ - A proven technology combining strength, protection and insulation that will renew your old roof.**

Developed originally from coating used on the NASA space shuttle, Thermo-2000™'s insulative and protective qualities have been proven effective in thousands of government, commercial and residential applications.

Therma-2000™'s elastomeric properties allow it to expand when wet, offering unexcelled protection against moisture penetration. When dry, the polymers shrink allowing trapped moisture to escape safely.

- **WATERPROOFS** and stops leaks
- **PROTECTS** against damaging sun rays
- **SAVES ENERGY** by insulating and lowering temperatures
- **RENEWS** the look of your roof
- **COLOUR IS** easily changed to suit your taste
- **DAMAGED SHINGLES** are repaired or replaced
- **EXCELLENT** for slate, asphalt or metal roofs
- **IDEAL** for shingle or flat roofs
- **PROFESSIONALLY APPLIED** by certified Thermo-2000™ experts.
