

Serving seniors

More than 70 local seniors enjoyed their meal at the Georgetown Lions' Club seniors dinner, May 16 at the Lions Hall. Lions Tom Colton (left) and Ivan Dumancic were among those members who served seniors like Mabel Voss (left) and Nell Beaumont.

Belles and Beaus enjoy season of polka, horse racing and shows

By NAN WHEELER

Special to The Independent/Free Press

Jehoshaphat! - now that's a good word.

Cousin Olive always warned me not to use "cuss words." Now those who know me best, realize how that limits my vocabulary - those "cuss words" just seem to roll off the end of my tongue, without me even knowing it. Well any ways, "Jehoshaphat", I have been reminded several times that I have not written a single line, this year, of the "doings" of the Belles and Beaus. I'll get busy on it, without further delay.

The beginnings of the year, found us in Kitchener at the Polka Party. Walter (Ostenak) had just won his second big award and everyone was in a party mood. The music was great and the food delicious. I found a new dancing partner, (I wore out my former pal) and we scarcely missed a dance - but "gee whiz Walter" you're going to have to shorten up those polkas (he goes on forever) - you have me puffing like a "stuck" or is it "stuffed" pig. Well

as Archie would say, "Whatever." At any rate it was a real fun day.

Then along came the Beaver show - Toronto's longest running show. I believe it was their 56 or 57th consecutive year and as usual it was a very entertaining evening. This show is put on, by the Beaver Bible Class of the Westway United Church and it is always a sell-out on its several nights of running.

On the stormiest day of winter, some of us ventured to Toronto to see Show Boat. How our driver ever managed that trip is a real wonder - it snowed, it blew, it gusted, but he managed to get us there and back without any catastrophe happening. It is a very good musical, with the black male singer stealing the show with his super rendition of Ole Man River.

A few of us managed to take in Forever Plaid and Crazy For You and some even took in Miss Saigon. Then along came the Tommy Hunter Show at Roy Thomson Hall. Ah me - Tommy has not lost one ounce of his striking personality. He played and sung for more than two hours and ended with his ever popu-

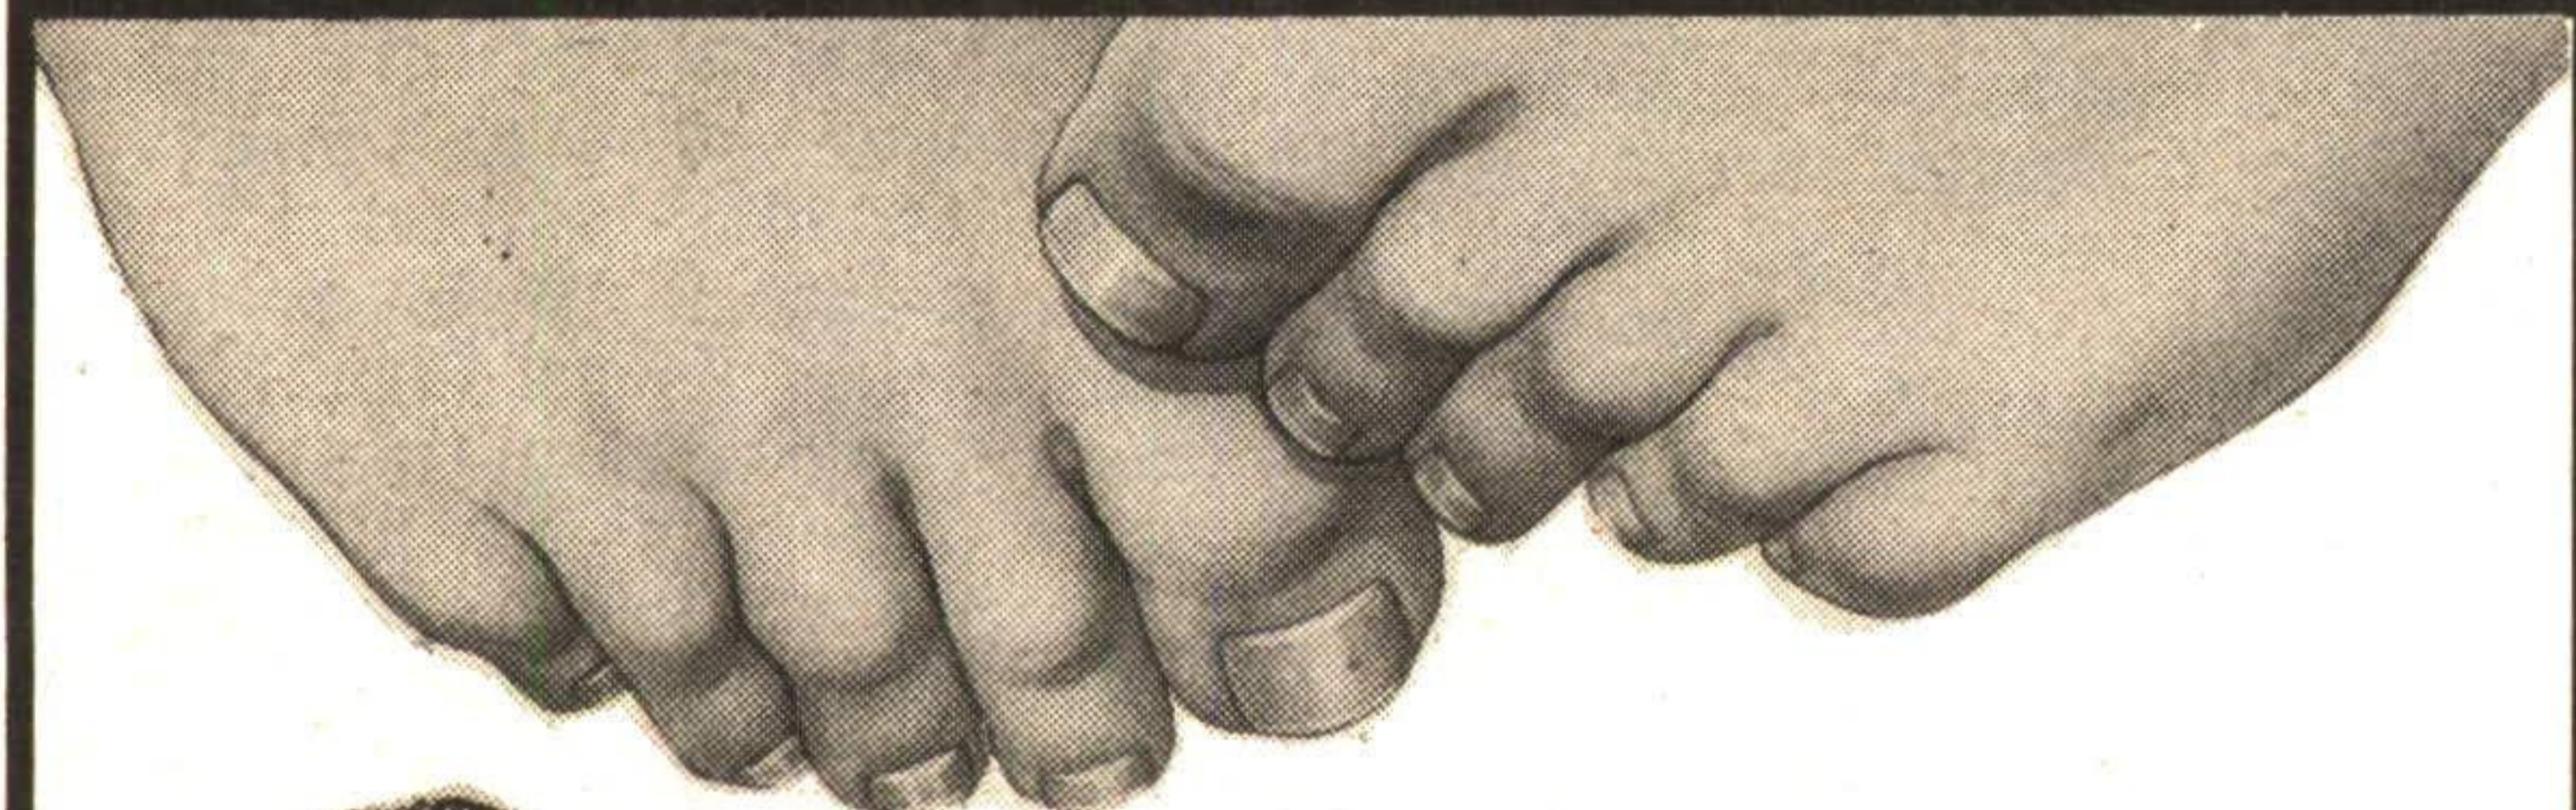

lar recitation. It's so nice to see and hear a man declare how proud he is to be Canadian and it was also nice to learn he was awarded the Order of Canada some time ago, 1986 to be specific.

A few of us went of the SkyDome with another group. On several former visits to the Dome I have sat at the 100 level and looked up to the 500 level and wondered, how on earth those folks managed to get a way up there. Well I managed to get a way up there. Well I found out - you just climb and climb and climb the steps until you reach the roof. It's a good thing they have the screen, so I can see the game. I'm not really complaining - why that's the closest to heaven I'll probably ever get.

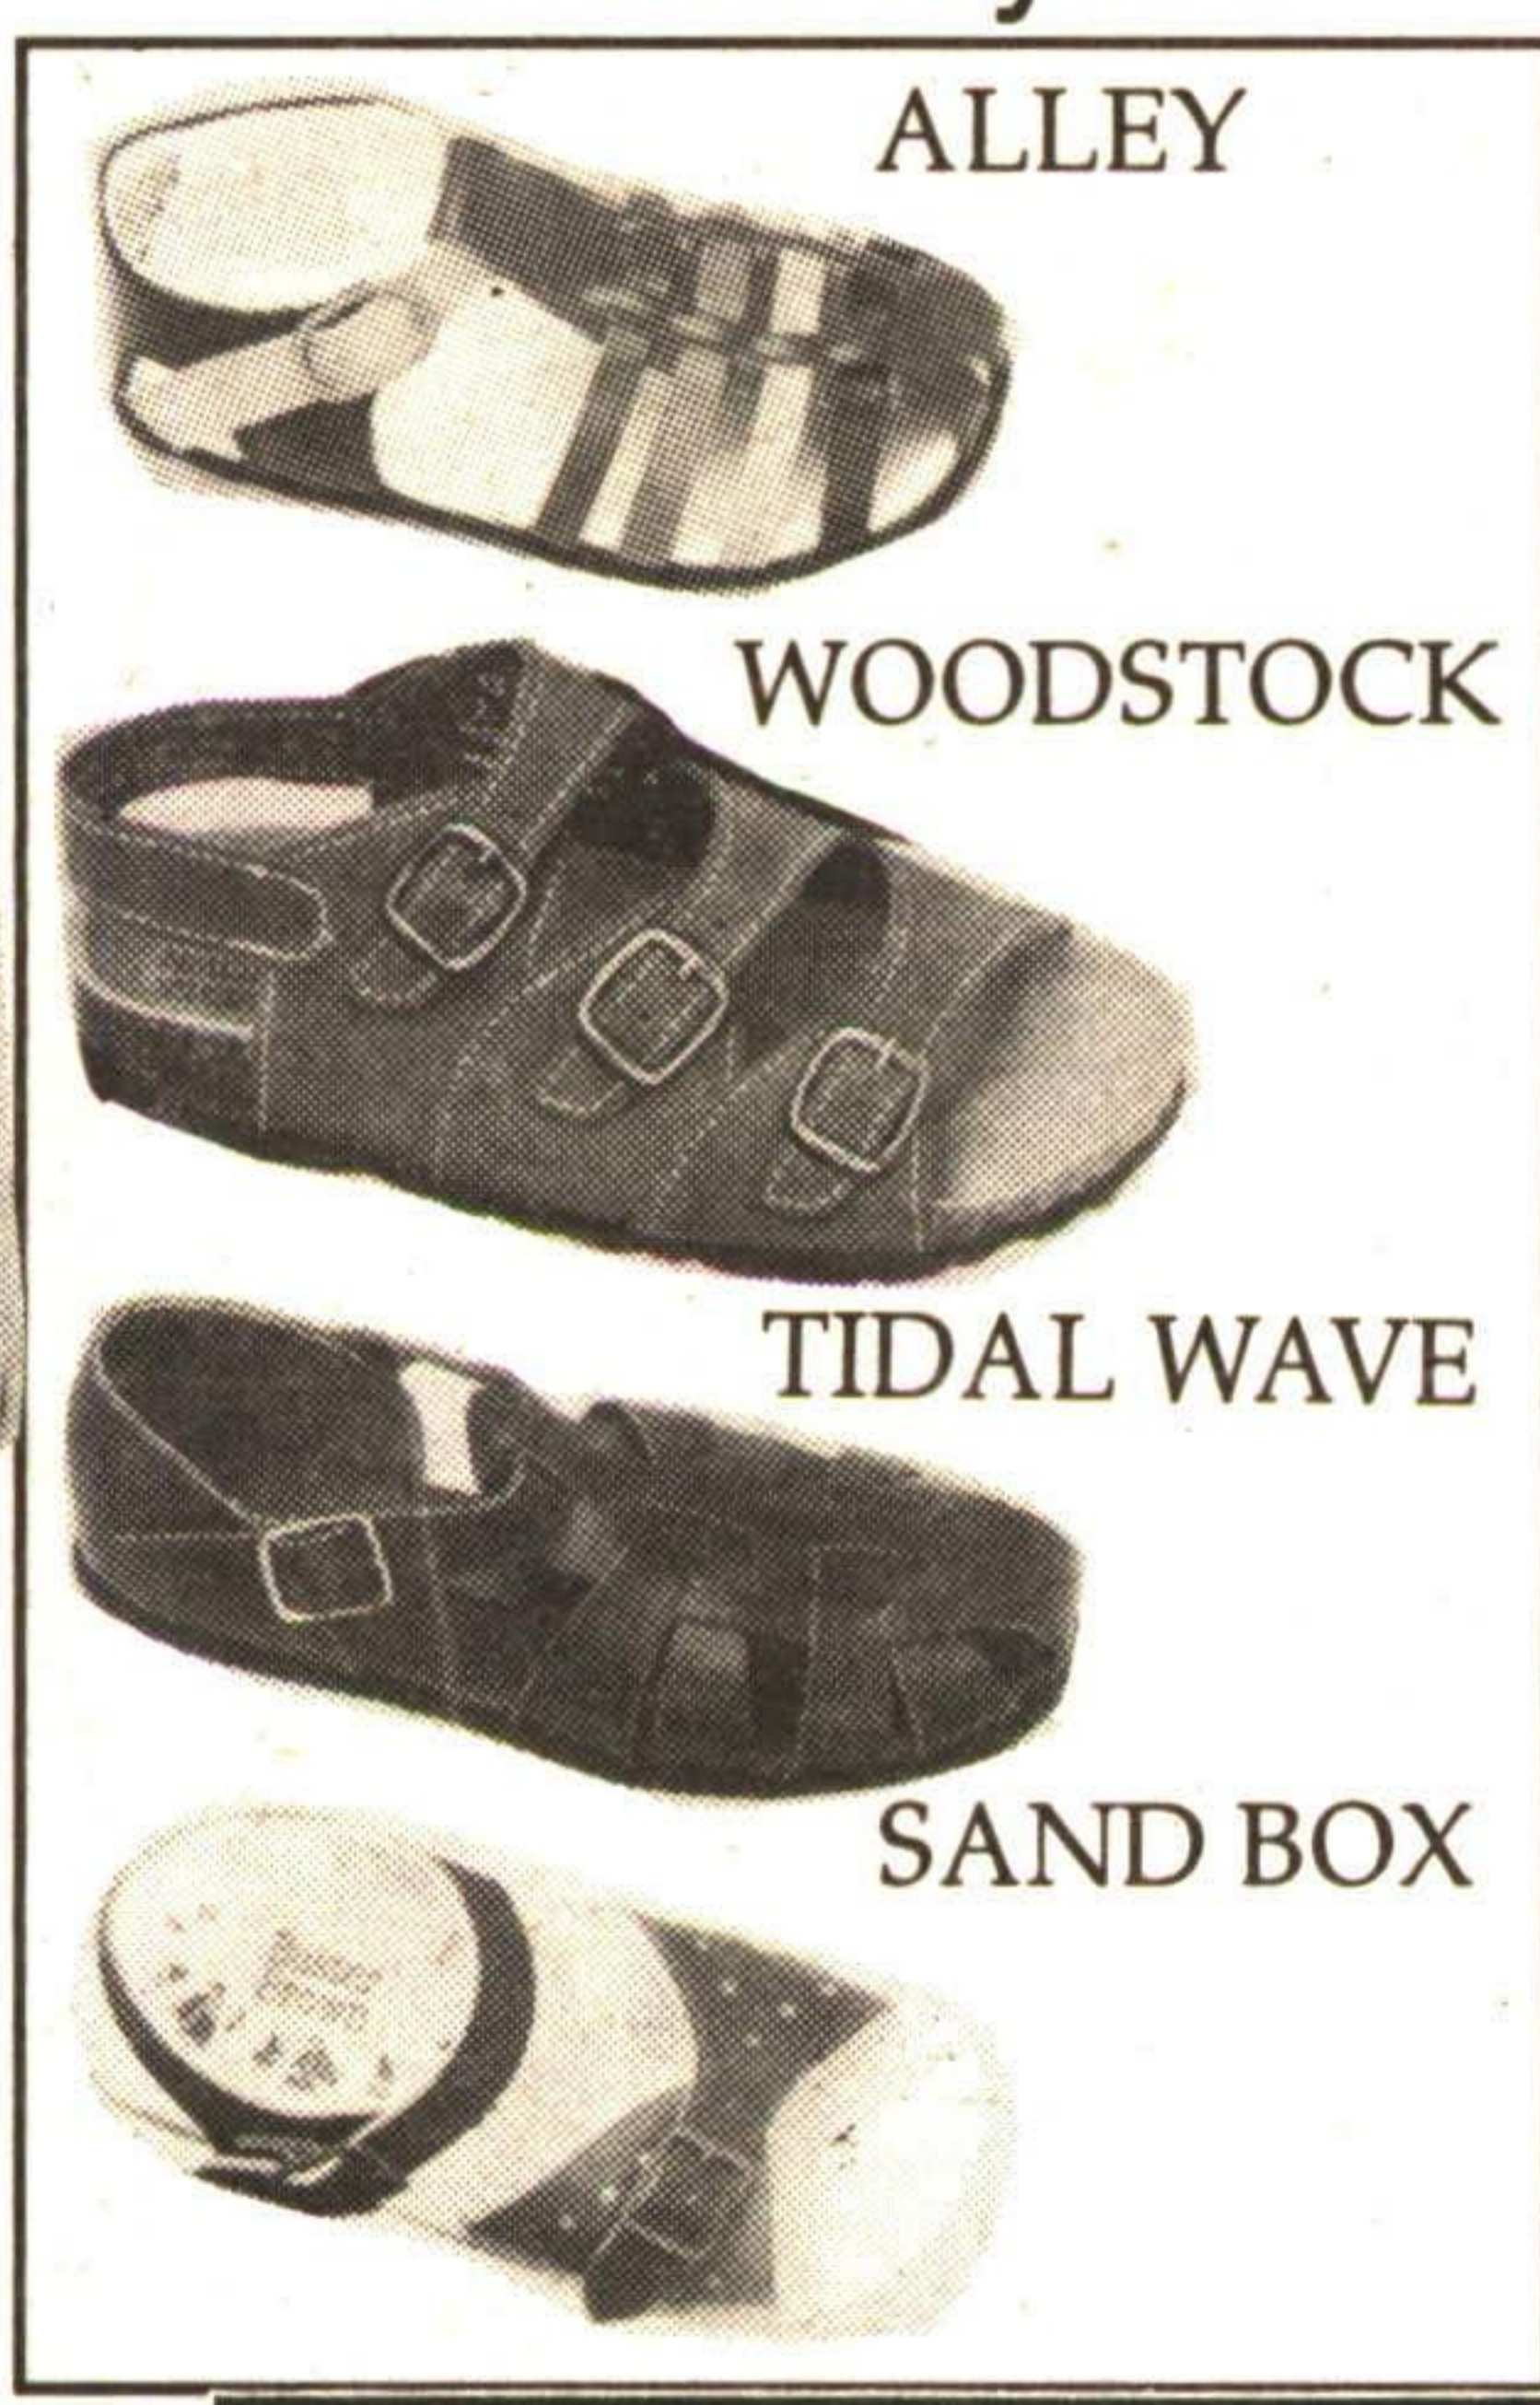

Soon we will be off to the Geritol Follies and we know from experience what a fun day that will be. Then our closing dinner at the end of June and a visit to the Woodbine in July will set us up for the summer.

Now don't you wish you were a member of the Belles and Beaus - well come join us in September.

MOM ... Here are 10 good reasons why your kids should be fitted at Fletcher's!

REGIONAL MUNICIPALITY OF HALTON HALTON URBAN STRUCTURE REVIEW NOTICE OF PUBLIC MEETING

WATER AND WASTEWATER SERVICING MASTER PLAN UNDER THE CLASS ENVIRONMENTAL ASSESSMENT and the SIXTEEN-MILE CREEK WATERSHED PLAN

The Halton Urban Structure Review is a process to establish a long-term Urban Structure plan for the Region of Halton. A joint public meeting is being held to present two of the supporting documents.

WATER AND WASTEWATER SERVICING MASTER PLAN

The Water and Wastewater Servicing Master Plan is a document prepared under the Environmental Assessment Act which analyzed alternative approaches and recommends a preferred method of providing water supply and wastewater treatment for new urban areas proposed in the Halton Urban Structure Plan.

The Halton Urban Structure Review water and wastewater servicing studies, undertaken to consider planned growth, have been concluded. In order to accommodate growth, the Region of Halton's preferred strategy consists of the following components: extension of Water and Wastewater Servicing by the construction of a new Water Purification Plant, an expansion to the mid-Halton Wastewater Treatment Plant and various reservoirs, pumping stations and trunk mains. These projects are located throughout the Region and maps showing the location of the projects will be available at the public meeting.

The water and wastewater projects are being planned in accordance with the **Class Environmental Assessment for Municipal Water and Wastewater Projects**. The Open House will provide further information to the public on the proposal and is being held to receive input and comment from interested persons. The proposed new Water Purification Plant and the proposed expansion to the mid-Halton Wastewater Treatment Plant are **Schedule C** projects under **Class Environmental Assessment for Municipal Water and Wastewater Projects**. The remainder of the projects are **Schedule B** projects, or, where the projects are being constructed within municipally owned roadways or utility corridors, are **Schedule A** projects.

SIXTEEN-MILE CREEK WATERSHED PLAN

The Sixteen-Mile Creek Watershed Plan is a technical document which establishes the principles for both water and terrestrial resource management and stormwater management. The Watershed Plan, now being prepared, will propose goals and objectives for the natural environment based on the results of technical studies on the potential impacts of urban growth. The Watershed Plan will recommend approaches, but not site-specific measures to meet the identified goals. Subwatershed studies are to be prepared in conjunction with more detailed land use planning (i.e. Secondary plans). The Watershed Plan has been carried out in accordance with the principles of Environmental Assessment. The Plan will be considered for adoption by the Region of Halton, Halton Region Conservation Authority and Area Municipalities. Any stormwater management facilities that are constructed in accordance with the subwatershed plans may be subject to the Class Environmental Assessment for Municipal Water and Wastewater Projects.

PUBLIC OPEN HOUSE

DATE & TIME: Thursday, June 2, 1994 from 6 p.m. to 9 p.m.
LOCATION: Auditorium, Halton Regional Centre
1151 Bronte Road, Oakville (on Hwy. 25, just north of QEW)

Subject to comments received as a result of this Notice and the Public Open House, the Region of Halton plans to instruct the consultants to proceed with the planning for these projects and the Master Plan will be prepared and placed on the public record. Further comments are invited for incorporation into the planning and design of these projects, and will be received during and following the public meeting, until June 17, 1994. For further information, please contact Mr. David McCleary or Ms Janet Amos, at (905) 825-6161 or from Acton 853-0501, from Georgetown 878-8113, or from Aldershot 639-4540 or from Streetsville 823-6720.

This Notice issued May 25, 1994
J.A. Eaglesham, Regional Clerk
