IODE mails off \$1,240 bale

Our last meeting for the summer was held at Rene Watson's in the form of a picnic supper. A cool night to be sure but with all the good food on hand for 14 ladies to enjoy we didn't really mind. Thank you again Rene for your hospitality and for the young helper you had with you, Mary Beth, thank you as well.

A short meeting was held after dinner to end our summer meetings. Our Regent Ernestine Foster lead us in the Prayer of the Order and Flag salute.

After reports from the secretary and treasurer, things to talk about were once again the topic around the table.

Both the McKenzie Smith and High School have been informed we will be presenting plaques as usual at their graduation exercises. And I assume at St. Joseph's as well. Rene Watson will present the one at

Lakeside
 IODE

DOT NORTON

McKenzie Smith on June 28.

Our annual bale to headquarters was packed this past week by Helen Joque, Rosalea Dawkins and our chief service lady, Joyce Sprowl. The bale was valued at \$1239.80, so as a small group we do very well. Thank you all ladies for your help and work over the year.

As always Jess Coles, Citizenship lady, brings to us a message of being truly Canadians. Fly your flags from everywhere to tell every-

one how proud we are to the Canadians. The first of July is a proud day for one and all. Also a short discussion on the "D-Day" services on TV. We can certainly be sure that every Canadian that day was proud of our armed forces. The British in their red uniforms on parade and the band from all over made many a person think of those days.

One of our recent Canadian citizens from the IODE tell how her father put her and rest of family behind the dumb waiter cellar way and stood at the door with a "WWI" bannet in hand as protection for the family. The Gibsons lived near Port Sunlight in England. Also our Regent Ernestine tells of her husband living in Wallasy, England of bombs dropping in their garden. Things to remember come close to home at these times.

We will be at the Leathertown Festival on August 7. Come visit, there will be goodies to buy and tickets as well on our raffles for the November Bazaar.

On a last parting note for the summer we have had the sad word of the passing of Bessie Vincent in Toronto. Bessie was a member of the IODE in the early starting of the group. Our thoughts go out to those who knew and remember and her husband Earl.

Come join us in September for our fall start up on September 6 at 7:30 p.m., Knox Presbyterian Church. Each and everyone are welcome. Just come visit and see what we try to do to help others. Goodbye for the summer.

We hope you all have a great summer at work or play from the ladies.

 ALEX TRENTON
 DENTURIST

TYPES OF TEETH, PORCELAIN OR PLASTIC?

Most teeth used to make dentures are made of either acrylic (plastic) or porcelain. Years ago, porcelain had advantages over acrylic. However, acrylic has been significantly improved over the past few years. Acrylic teeth resist wear to a greater degree and have become much more attractive and natural looking. Both types of teeth are used for different reasons.

PORCELAIN TEETH

Porcelain is much harder than acrylic, however it is brittle like glass and tends to chip or fracture if dropped or overstressed by constant biting. Many people who have porcelain dentures complain of clicking sounds whenever the teeth meet. Porcelain teeth should be used when a patient has jaw joint problems such as TMJ (temporomandibular joint dysfunction). In these cases, it is important that a consistent bite is maintained with the least amount of wear deviation. Years ago porcelain teeth used to look much more natural. However, today acrylic's have come a long way, and it is very difficult to tell the difference between the two.

PLASTIC TEETH

Although porcelain is harder than plastic, the fact that acrylic may wear down a little sooner can be a distinct advantage. This wearing action may ultimately result in better preservation of the tissue and bone. Since porcelain teeth resist wear they do not absorb chewing stresses which may eventually traumatize the tissue and shrink the supporting bone structure. Acrylic teeth are the best choice where a denture meets with nature teeth, because porcelain teeth are much stronger than natural dentition. Acrylic teeth can be ground and reshaped allowing greater variation in tooth placement and design.
