CARING FOR DENTURES

1. Remove dentures every night. brush your teeth, tongue and gums carefully with a soft toothbrush. Be sure to clean and massage your gums. If your toothbrush causes irritation, try moistened gauze.

2. Soak dentures overnight in luke warm water or denture cleanser. This loosens plaque so you can brush it off more easily. If your dentures have metal clasps, use water only.

See your dentist regularly. Your mouth changes constantly so dentures will need adjusting from time to time to ensure the best fit.

If you are in hospital, it is recommended that you have your name inserted in your dentures, in case of mix-ups. name inserts can be done while you wait, at a very minimal cost.

You do not need a referral, simply call our office direct.
