

WANTED

30 PEOPLE WITH HEARING LOSS

Qualified Participants Needed for Technology Field Test

We're looking for people like you, who may be experiencing varying levels of hearing loss to evaluate a remarkable new line of digital hearing aids and a rehabilitative process that could be the solution to your difficulties. There's no cost or obligation to participate!

Call us toll-free today at one of the numbers below to see if you qualify for this Field Test. Potential candidates will be given a FREE hearing test to determine candidacy.

Participants will be given a FREE in-office demonstration, as well as the opportunity to evaluate and report their experience wearing the latest, most advanced hearing aid technology for 30 days. A full range of styles are available in this new technology, including the exceptionally discreet open-fit and invisible-in-the-canal models shown here:

Similar to choosing between contact lenses or glasses, you can decide with your hearing professional which hearing aid style would best suit you. Both styles have approximately the same performance and functions, but are fitted to the ear differently.

It's almost a shame this technology isn't more visible!

Open-fit and IIC hearing aids are smaller and more sophisticated than ever, striking the perfect balance between size and performance. The elegant and highly discreet open-fit hearing aid fits perfectly on top of your ear, and the thin tube in your ear canal is designed to disappear against your skin. The new IIC hearing aid—now with wireless technology—provides all of the outstanding features and benefits you want in a digital hearing aid, minus the stigma that came with wearing one in the past.

CALL NOW - Candidates are being selected.
The selection process for this test period will end March 31, 2016.

HEALTH

Five steps to better oral health

Dental hygienists remind us that good oral health is essential for overall health and well-being. They encourage all of us to commit to a good daily oral hygiene routine whose benefits will last a lifetime. All it takes is five simple steps:

1. Brush your teeth at least twice a day with fluoride toothpaste.

2. Clean between your teeth daily.
3. Rinse using an antiseptic mouthwash.
4. Make healthy food and beverage choices.
5. Choose to be tobacco free. Tobacco products can increase your risk of developing oral cancer.
