

GLIC hosting auditions

On Thursday, June 9, at 7:30 p.m., Georgetown Little Theatre is hosting auditions for the annual Studio Shows festival. Consisting of three dark and edgy one-act plays, there are 11 parts for men and women ages 18 and up.

The auditions are being held at 33 Stewarttown Rd. Monologues are not required. Actors will be asked to read from selected scenes from the plays.

Each play explores the darkness of humanity. The faceless evil of blind obedience. Murder without consequence. Infidelity and class warfare. Drama, comedy and something in between. You never know what to expect with the Studio Shows

Past performances have included sold-out performances of original works and timeless classics. The Studio Shows are an opportunity for GLT members to showcase plays that wouldn't normally be seen as part of the mainstage selections.

2016 Studio Show performances are Sept. 15, 16 and 17 in Stewarttown; and, Sept. 22, 23 and 24 in Acton. Rehearsal times will be determined by final casting.

COMMON QUESTIONS ABOUT TINNITUS - PART 2 DO WE KNOW WHAT TINNITUS IS??

The actual cause or event or mechanism of Tinnitus is not known. We know it is real; it is a symptom that something is wrong in the auditory system, but we do not know what that something is. We do know that it is not the patients imagination; it is a physiological or neurological event. There is reason to be hopeful because current research using a Tinnitus model may provide the necessary information for identifying its cause.

IS IT ASSOCIATED WITH HEARING LOSS?
In most cases, Tinnitus is associated with some hearing loss. For example, those who have been exposed to excessively loud sounds may have a hearing loss for the high pitched tones. Usually their Tinnitus will be located as a high pitched tone in the region of the hearing loss. In some cases Tinnitus is present where there is no hearing loss and for no discernable reason. For more information feel free to call...
