

# Cadillac says the first-ever 2017 CT6 plug-in hybrid goes on sale 17

Cadillac has announced the first-ever 2017 CT6 Plug-In Hybrid prestige sedan will go on sale in the spring of 2017 with a total driving range of more than 400 miles.

Advanced plug-in hybrid technology enables the luxury sedan to reward drivers with environmentally conscious

driving without compromising on performance the engine and battery at higher speeds and higher loads.

All-electric range is an estimated 30 miles.

However, the car's combination of efficient engine and battery power enables drivers the freedom of more than 400 miles

of total driving range, with no requirement to find charging stations along the way.

The CT6 Plug-In Hybrid is expected to have fuel economy estimated at 65 mpg.

Miles per gallon equivalence MPGe compares energy consumption of plug-in electric vehicles and other

advanced technology vehicles with the fuel economy of conventional internal combustion vehicles in miles per U.S. gallon.

The CT6 Plug-In Hybrid combines an all-new rear wheel drive electric variable transmission to provide the smooth, powerful acceleration

expected from a driver's car.

The two-motor EVT system combines with the 2.0-litre turbocharged four-cylinder gas engine to produce an estimated total system power of 335 hp and 432 lb/ft of torque. This helps propel the vehicle from a 0-60 mph in an estimated 5.2 seconds.

## Prepare your Car for Winter

### 8 ESSENTIAL CAR CARE TIPS

1. **Check your oil** - Regular oil changes are essential for winter driving. Use the recommended oil grade for your vehicle.

2. **Check your tires** - Winter driving requires tires with good tread. Check your tire pressure regularly and rotate your tires.

3. **Check your battery** - Cold weather can drain your battery. Test your battery before winter and replace it if necessary.

4. **Check your brakes** - Winter driving requires good brakes. Check your brake pads and rotors.

5. **Check your antifreeze** - Antifreeze is essential for winter driving. Check your antifreeze level and top it up if necessary.

6. **Check your wipers** - Winter driving requires good wipers. Check your wiper blades and replace them if necessary.

7. **Check your headlights** - Winter driving requires good headlights. Check your headlights and replace them if necessary.

8. **Check your windshield** - Winter driving requires a clear windshield. Check your windshield for cracks and chips.

9. **Check your car wash** - Winter driving requires a clean car. Wash your car regularly to remove salt and dirt.
