

# Town receives funding for streetlight replacement project

The Town has received notice from the Federal Economic Development Agency for Southern Ontario that up to \$78,000 in funding has been approved for a streetlight replacement program in the Princess Anne Dr. area.

The Canada 150 Community Infrastructure Program is being delivered by regional development agencies across the country to celebrate Canada's 150th anniversary of Confederation in 2017. The program supports the renovation, expansion and improvement of existing community and cultural infrastructure, including projects that support the Government's priorities to provide a better future for indigenous peoples and promote a clean growth economy.

The streetlight replacement project within the Princess Anne Drive area is a joint project between Halton Hills Hydro

and the Town of Halton Hills. Halton Hills Hydro is currently upgrading their system by replacing transformers to proactively manage aging assets to provide a reliable electrical system. As part of this work, new underground cabling, streetlight poles, pad mounted transformers and LED luminaries will be installed within the surrounding area. It is anticipated that this work will be fully completed by fall 2017.

It's wonderful to receive federal funding for a portion of

this project. We are proud to be implementing this green technology to reduce overall energy consumption and greenhouse gas emissions, said Mayor Rick Bonnette.

This project aligns with the Town's Strategic Plan's Top Eight Priorities under Sustainability and also with the Mayor's Community Energy Plan and the Community Sustainability Strategy.
