This year, festivities will be spread across several different venues in downtown Georgetown, instead of one large stage at the fairgrounds.

# Toronto Pearson: International Noise Benchmarking and Best Practices Report Launch

Join us on **September 27, 2017** from **6:30 p.m. – 8:30 p.m.**  
for our Community Environment & Noise Advisory Committee (CENAC) meeting for the  
release of our Noise Management Program Benchmarking and Best Practices Study.

**NEW LOCATION:**

Toronto Congress Centre,  
650 Dixon Road,  
Etobicoke, ON, M9W 1J1

**What is CENAC?**

CENAC is a forum for discussion between the community and the Greater Toronto Airports Authority (GTAA) on matters relating to aircraft noise and the environmentally responsible operation of Toronto Pearson International Airport.

**What can you expect to learn?**

In 2016, the GTAA hired UK aviation consultant Helios to undertake a Noise Management Program Benchmarking and Best Practices study. The study looked at 11 areas of noise management at 26 comparator airports around the world to identify potential new programs to be adopted at Toronto Pearson. This is the release of the report's findings. There will be opportunities to speak with experts, including Toronto Pearson staff. **This meeting is not focused on decisions around runway usage.**

**Why is this important?**

Toronto Pearson serves Canada's largest and fastest-growing metropolitan area. The GTAA is committed to managing and reducing the impact of our operations and is reviewing a range of ambitious targets and actions to reduce the impact on GTA residents. Our updated five-year Noise Management Action Plan will be released this winter following a year of detailed study and consultations. Understanding international best practices is an important step in the development of this plan.

**How do I RSVP?**

Visit [www.torontopearson.com/noisemanagement](http://www.torontopearson.com/noisemanagement) to register and to learn more about CENAC and the GTAA's important noise consultations and studies.
