## GIFT GUIDE

# Tips to save on your holiday decorating

(NC) Nothing says holiday cheer like decorations, but with decorations getting bigger, brighter and more expensive every year, it's easy to go overboard. Whether buying a new star for the tree or splurging on table settings, the possibilities and spending seem endless. Check out the tips below to learn how to deck the halls without breaking the bank.

**Add your own festive sparkle.** Get your family and friends together for a craft day to turn DIY decorating into a holiday tradition. Making decorations yourself is easy, tons of fun and can be super inexpensive.

**Opt for LED lights.** LED lights keep your house sparkling all season for less. High-quality LED lights use less electricity than traditional incandescent bulbs,

have a long lifespan, perform well in cold temperatures and are resistant to breakage.

**Do a decoration swap.** If you're the type of person who needs new holiday décor every year, host a decoration swap. Get together with friends and fam-

ily and exchange your old decorations for completely different ones at no extra cost. Not only does this save money, it's a great excuse to spend a relaxed afternoon with loved ones amid the hustle and bustle.

**Create a holiday card display.** Take advantage of the beautiful photos sent to you by your family and friends and use them to decorate your home. A holiday card display is beautiful, sentimental and doesn't cost a dime.
