

This spring get the fresher, younger look you deserve

If you have been wondering where the lines on you co-workers' face have gone, then stop wondering... here is the secret to their magic.

They have been consulting, not just your neighbourhood beauty salon, but with medical professional experts... now readily available in our own community of Georgetown.

For those wrinkles/lines on the forehead and between the eyebrows that give people that angry appearance, one can make them disappear within days after treatment with botox or xeomin injections. This is a protein that, when injected in the muscle, relaxes the muscle and make the lines disappear. This injection is safe when injected by trained professionals.

Botox has been used in medicine for many years to treat migraines, excessive sweating and blepharospasm— a condition where the eye muscles twitch involuntarily.

Fillers are another magic secret substance which mimic the natural substance found in the connective tissue of our body. Filler is typically injected in the laugh lines to reduce the depth

of the lines. Filler can potentially take 10 years off one's appearance. Lines and wrinkles can disappear off the face and give you that younger fresher look within minutes of the injection— yes, the result is immediate! Everyone will wonder but no one will know.

For more information on any of these products and services, contact your local cosmetic clinic.
