## Town: Report potholes please

The recent fluctuation in temperatures has resulted in the appearance of the scourge of drivers everywhere- potholes.

Potholes are caused when moisture enters a crack in the granular base below the surface asphalt, then freezes and expands during cold periods. The expansion puts pressure on the crack, causing the asphalt to break away, resulting in a hole. As vehicles pass over the pothole the sides crumble and its size increases.

The Town of Halton Hills encourages all residents to report potholes by calling (905) 873-2601 ext. 2603 to leave a request for service.

The Town is advising motorists that pothole repairs are underway and are repaired based on the same priority system as the Town clears snow. High traffic arterial roads will be repaired first, followed by collector roads and finally local residential areas.

"The Town of Halton Hills Public Works Department is diligently repairing potholes in roadways as they appear. We are mindful of the disruption these potholes can cause and I am confident our crews will address our citizens' concerns promptly and effectively," said Halton Hills Mayor Rick Bonnette.

The Town reminds motorists that the repairs being made are temporary measures only, as the moisture is still in the

ground and it is prone to the ongoing freeze/thaw cycle.

Once it gets warmer Public Works staff will have the opportunity to fill the potholes with a more permanent asphalt material.

It's important for motorists to approach potholes with caution as water or slush can hide their depth and size.

### Tree debris info

Halton Region's enhanced bulk brush collection service continues to the end of February to assist residents.

This means that residents in areas of Halton where yard waste is regularly collected can set out one pile of unbundled bulk brush on their regular garbage collection day. Residents and contractors can also drop off brush debris at the Halton Waste Management Site in Milton free of charge.

The Town has opened two locations for residents to drop off tree debris.

- Robert C. Austin Operations Centre, 11620 Trafalgar Road, Georgetown
- Acton Public Works Yard, 1 Commerce Crescent, Acton

Both facilities will be open to the public seven days a week, 24 hours a day.
