## School celebrates 50 years

By **EAMONN MAHER**  
Staff Writer

Pineview Public School in southwest Halton Hills is getting ready to mark its 50th anniversary on Saturday, April 26 and invites all alumni to join in the celebrations.

Located at the corner of Trafalgar Rd. and 5 Sideroad, Pineview is far

from the first school in the Halton District School Board to reach the half-century mark, but its unique geographical features set it apart from most.

There are no sidewalks around the property, so all students must be bused in — one of only a handful of schools in Halton in that category.

### DENTAL IMPLANT TREATMENT:

Dental implants are small titanium anchors that are permanently placed into your upper and/or lower jaw bone. Throughout time, the implant integrates with your bone and acts very much like your natural tooth root. This integration not only creates a stable foundation to attach single and multiple teeth or dentures to, it also slows bone loss because it is acting like a tooth root in your bone. People with multiple or all of their teeth missing typically have complete or partial dentures; this treatment option is called Overdentures. Overdentures are replacement teeth retained by dental implants. Overdentures were developed to allow patients to regain a quality of life, which most likely has been missing since they lost their teeth.

Make an appointment today to see how you can experience all the many benefits of Overdentures!
