## Save energy

Continued from pg. 3

and other electronics into a power bar and turn it off when not in use.

- Purchase only EnergyStar® appliances. They are more efficient.

- Use a programmable thermostat and set your AC at 20C.

- When you leave a room and don't need the light, turn it off.

- Whenever you can, carpool, take GO Transit, walk or cycle, rather than driving.

- Complete a home energy audit to find opportunities for improved energy efficiency.

- Looking for a new house? Look for efficient construction, including EnergyStar® labeled homes.

Building on the Town's many existing energy conservation projects, the Town of Halton Hills is nearing completion of the Mayor's Community Energy Plan – in close collaboration with Halton Hills Community Energy Corporation.

The Plan will be designed to provide a practical roadmap for the Town to achieve operational efficiencies that can result in lower Town facility operating costs, vehicle fleet improvements and enhanced energy management. The Plan is also anticipated to help reduce energy use and greenhouse gas emissions in the broader community. Possible economic benefits may include lower energy costs and new employment.

In terms of the Town's municipal operations, the Energy Plan will meet the requirements of the Green Energy Act by preparing a five-year Corporate Energy Plan. It is also anticipated to recommend targets for reducing energy use and greenhouse gas emissions from municipal operations.

Halton Hills already has the many key ingredients needed to achieve greater energy efficiency, including:

- Thriving downtown areas of Acton and Georgetown

- Extensive greenspace

- Emphasis on more compact development

- Strong relationship with Halton Hills Community Energy Corporation

- Existing initiatives focused on energy efficiency and greenhouse gas reductions

If you have any comments or suggestions on the Mayor's Community Energy Plan project, share them with the Planning, Development and Sustainability Department by May 23 via [www.haltonhills.ca/sustainability](http://www.haltonhills.ca/sustainability) or [sustainability@haltonhills.ca](mailto:sustainability@haltonhills.ca) or 905-873-2601 ext. 2289.
